I. PROJECT STATUS AND RATIONALE FOR RESTRUCTURING

A. Progress to date

- 1. The project has shown positive progress in all major planned activities which are summarized below.
 - (a) The preparation of procurement legal documents in the newly established Sidama and Southwest Regional states.
 - (i) Sidama: The draft procurement proclamation and procurement directive are prepared in Sidama regional states. In addition, the regional states carried out consultation with various stakeholders including procuring entities, relevant members of the regional council, PPPA and procurement officers. The documents are ready for ratification by the regional council.
 - (ii) South West Regional state The draft procurement proclamation and procurement directive are prepared in South west regional states. In addition, the regional states carried out consultation with various stakeholders including procuring entities, relevant members of the regional council, PPPA and procurement officers. The documents are ready for ratification by the regional council.
 - (b) Establishment of training program for staff in the regulatory bodies.
 - a. PPPA hired an international consulting firm to support the preparation of training modules and for providing Training of Trainers. Accordingly, the consulting firm prepared draft training modules in three functional areas which are reviewed and commented by PPPA. The consulting firm is expected to finalize the training modules in the next two to three weeks.

The World Bank

Ethiopia Public Procurement System Strengthening Project (P179041)

- b. After finalizing the training modules, the consulting firm will provide training of trainers on the documents for senior staff to be selected from federal and regional procurement regulatory bodies.
- (c) Evidence based procurement assessment and preparation of documents.
 - a. Emergency procurement procedure: A consultant hired by PPPA prepared and submitted final emergency procurement procedure after incorporating comments provided by stakeholders.
 - b. Report on sustainable public procurement: Consultants hired by PPPA prepared and submitted draft report on sustainable public procurement which is under review in PPPA and stakeholders.
 - c. Procurement record management procedure: The consultant hired by PPPA prepared and submitted final procurement record management procedure after incorporating comments from stakeholders.
- (2) Activities to be completed within the proposed new project closing date: Almost all of the planned documents will be completed within the existing project closing date. However, providing training to staff in the regulatory bodies, and other stakeholders on the prepared documents remain to be completed within the extended project closing date. The team also confirm that (i)The PDO remains achievable by the proposed extended Closing Date; (ii) the Recipient's performance is satisfactory (or moderately satisfactory); and (iii) there are no overdue audits
- (3) **Rationale for extending the closing date**: The project implementation period was much shorter than the originally planned time frame due to the delay in the approval of funding to the project. However, PPPA carried out most of the planned activities but few activities related to training and finalization of documents are remaining. Thus, the team is considering restructuring of the project to extend the project closing date by two months and ensure proper completion of all of the planned activities. The team has received request for extension from the client. This one-month extension is as per the DFI's clearance for reduction of the grace period from 5 to 4 months. (Email dated June 22,2023, attached as part of the restructuring paper

II. DESCRIPTION OF PROPOSED CHANGES

- A. Extension of project closing Date:
 - a. This restructuring proposes extension of the oroject clsing date by one month from June 30,2023 up to July 30,2023.
 - b. The schedule for training of staff in the procurement regulatory bodies is extended up to July 30,2023
- B. The Summary of Performance of E&S Risk Compliance

There are progresses in the implementation of Environment and Social Risk Mangement (ESRM) of the project since its effectiveness. These include the project implementer has assigned an Occupational Health and Safety (OHS) trained staff to oversee the Environment, Social, Health and safety (ESHS) activities during project implementation. Public Procurement and Property Authority (PPPA) has ensured the adoption of the existing HR Manual during project staff recruitment, managing issues related to labor and working conditions, benefits and entitlements as per the Labor Proclamation. Furthermore, in addition to the adoption of the existing public grievance mechanism (GM), workers' GM has been also availed to be accessed by all workers who may have any concerns.

However, the project needs to strengthen further stakeholder engagement activities, the operationalization of the existing GMs to receive and facilitate timely resolution of grievances, provide trainings to its staff on OHS, Grivance Redress Mechanism (GRM), Stakeholder Engagement, Gender based Violence (GBV) prevention, gender and social

inclusion, etc. and regularly submit a six-monthly monitoring report on the implementation of the Environment and Social Commitment Plan (ESCP).

Describe any E&S issues and impacts associated with the change in project design. Identify and describe any potential large scale, significant and/or irreversible impacts.

Describe any potential indirect and/or long-term impacts due to anticipated future activities in the project areas.

Describe any project alternatives (if relevant) considered to help avoid or minimize adverse impacts.

Describe measures taken by the borrower to address E&S policy issues. Provide an assessment of borrower capacity to plan and implement the measure described.

Identify key stakeholders and describe the mechanism for consultation and disclosure on E&S policies, with an emphasis of potentially affected people.
