Stakeholder Engagement Plan (SEP)

For the

Yemen Emergency Human Capital Project (YECHP) (P176570)

Prepared for the Benefit of the Republic of Yemen by

United Nations Children's Fund (UNICEF),
United Nations Office for Project Services (UNOPS), and
World Health Organization (WHO)

Updated for Third Additional Financing - July 2024

ADVANCED DRAFT

Previous updates:

First disclosure – 30 May 2021
First update - September 2021
Update for First Additional Financing - April 2022
Update for Second Additional Financing - June 2023

1. Introduction/Project Description

Country Context

After nine years of conflict, the needs in Yemen remain immense, with split governance structures across all sectors aligned to the two governing authorities presiding over two thirds of the population in the north (Ansar Allah [AA] or Houthi's) and the other presiding over one third of Yemen's population in the south (Internationally Recognized Government [IRG]). While a de facto continuation of the UN-brokered truce, which formally elapsed on 02 October 2022, provided some relief to civilians, the overall situation in Yemen remains dire and fragile. Public revenues are under immense stress, as the country's economy shrank dramatically by 54 percent in GDP per capita between 2015 and 2023. The IRG's fiscal revenues, including grants, declined by over 30 percent in 2023.

The conflict in the Middle East has escalated tensions, raising the potential for further conflict including increased insecurity for shipping lines in the Red Sea. At the start of 2024, at least half of the country's population required humanitarian assistance and protection services, with an estimated 17.6 million facing acute food insecurity, and over 18.2 million people rely on humanitarian assistance.²

By March 2024 through the Yemen Emergency Human Capital Project (YEHCP), 14.1 million beneficiaries (target of 18.9 million) received health and nutrition services at over 2,398 health facilities, 140 hospitals, and through outreach and mobile teams. Among these beneficiaries, 9 percent are internally displaced persons (IDPs, target of 8 percent). Over 8 million women and over 5.8 million children received health and nutrition services (targets of 9.99 million and 7.42 million, respectively). More than 963,006 people are receiving access to improved Water and Sanitation System (WSS) (target of 2 million), of which 48 percent are female beneficiaries.

Project Objectives

The YEHCP (P176570)³ aims to contribute to efforts by the international community to maintain, expand and enhance health and nutrition services in line with Yemen's Minimum Service Package⁴ (MSP) and respond to health and nutrition crises and contribute to the provision of safe water and improving WSS capacity. As per the original YEHCP project funding ("original financing" or OF), the first and second additional financing (AF1 andAF2 respectively) targeted the whole country, with some interventions focused on specific governorates or districts as per the priorities and needs. Following a significant reduction in the funding envelope for the third additional financing (AF3), the proposed AF3 programme is designed based on a framework approach design to initially only sustain public health gains achieved through the Yemen Emergency Health and Nutrition Project (YEHNP) (P161809) and YEHCP by providing a prioritized package of the most essential interventions to preserve the basic functioning of strategically targeted primary health care facilities (PHCs) and hospitals throughout all geographic regions of Yemen, and improving water, sanitation, and hygiene (WASH) services in areas that are experiencing an active

³ The Stakeholder Engagement Plan was updated over the lifetime of this project: Disclosed May 30, 2021; First Update September 2021; Update for First Additional Financing April 2022; Update for Second Additional Financing June 2023; and Updated for Third Additional Financing, July 2024.

⁴MSP is a compendium of accessible health services corresponding to the Disease Control Priorities (DCP)-3 This is the highest priority package of the most critical, relevant, cost-effective, and affordable interventions suited for Yemen.

cholera outbreak. As more resources become available over the 3-year period of the framework approach either from the World Bank's International Development Association (IDA) or other donors, they will be added to build the project back up to its full design and continue scale-up of service coverage and scope (expanding to, but not exclusive to non-communicable disease {NCD} and mental health programming) and health systems strengthening (HSS) for enhancing quality of care and sustainability.

The AF3 will finance essential lifesaving activities building on the activities supported by the OF, AF1, and AF2. It will also incorporate efficiency gains achieved in the project. The PDO remains relevant, as do the existing components and sub-components. Institutional and implementation arrangements remain the same. AF3 will introduce a Framework Approach with a three-year time frame. The proposed AF3 will invest the initial available funding of US\$50 million into the most essential interventions to preserve the basic functioning of high impact and high volume PHCs and hospitals throughout all governorates of Yemen and improve WASH services in areas that are experiencing an active cholera outbreak. As more resources become available, they will be added to expand the scope of services provided and the project's geographic reach. Therefore, each sub-component describes a "base package" of activities that will be financed with an IDA envelope available at AF3 project approval. It then describes the "full package" that details how funds will be allocated up until the full financing gap of US\$400 million is covered. The full project's core components are:

Component 1: Improving Access to Healthcare, Nutrition, and Public Health Services (implemented by UNICEF and WHO)

• Component 1 aims to sustain essential health and nutrition services while building national stewardship to run the health system. The component also builds national health system preparedness and response capacity. The proposed AF3 will finance eligible activities that are currently supported by the Project (OF, AF1 and AF2). The AF3 base package will continue to finance delivery of the highest impact and most essential services in the MSP, including maternal, newborn and child health and nutrition services, at a sub-set of the currently supported primary, secondary and tertiary level health facilities. Facilities will be selected based on a combination of criteria – notably the volume of services delivered, service delivery capacity, and geographic location – to ensure that the highest number of people maintain access to health services. As more financing becomes available, it will be allocated to cover more health facilities with the MSP; and deliver a broader package of services at each health facility, including NCD, mental health and psychosocial support (MHPSS) services. Funds will then be added to strengthen pandemic preparedness and response in close coordination with the newly launched Pandemic Preparedness and Response Project (PPRP), and to invest more heavily in HSS, quality improvement initiatives and building national capacity to run the health system.

Details of Sub-components

- Sub-component 1.1: Improving Access to the Minimum Service Package (MSP) at Primary Health Care Level (implemented by UNICEF)
- Sub-component 1.2: Improving Access to Essential Preventive and Curative Nutrition Services (implemented by UNICEF)
- Sub-component 1.3: Improving Access to the MSP at Secondary and Tertiary Health Care Levels (implemented by WHO
- Sub-component 1.4: Sustaining the National Health System Preparedness and Public Health Programmes (implemented by WHO)

Component 2: Improving Access to Water Supply and Sanitation (WSS) and Strengthening Local Systems (implemented by UNOPS)

• Improved WSS plays a crucial role in promoting better health and nutrition outcomes. This component will continue to support the same interventions funded under EHCP (OF, AF1 and AF2) including water sanitation, and hygiene (WASH) activities. It will rehabilitate WSS facilities, including water and sanitation networks, Wastewater Treatment Plants (WWTPs), Water Treatment Plants (WTPs), water wells, and booster and pump stations. The rehabilitation will support the supply, installation, and use of solar panels. The Project will also provide hygiene support to key schools and health facilities. All activities will be implemented with a capacity building program. The proposed AF3 will prioritize WSS activities targeting cholera hot spots and highly populated cities impacted by the recent flash floods including capacity building interventions and the needed technical assessment studies for critical WSS interventions and sustainability of water in the wellfield catchment areas as described in the below sub-components.

Details of Sub-components

- Sub-component 2.1: Restoring Access and Improving Quality to WSS Services in Selected Urban and Rural Areas (implemented by UNOPS)
- Sub-component 2.2: Emergency Support for WASH Interventions to Prevent and Respond to Communicable Diseases and Flash Floods (implemented by UNOPS)
- Sub-component 2.3: Enhanced Capacity-Building of Water and Sanitation Institutions at the Local Level (implemented by UNOPS).

Component 3: Implementation Management and Monitoring and Evaluation (implemented by UNICEF, WHO, and UNOPS)

- This component will continue to support the implementation, administration, management, monitoring and evaluation (M&E), and environmental and social aspects of the Project. It includes: (i) direct cost; (ii) indirect cost; (iii) provision of consultancy services required for Project monitoring, evaluation, and coordination at the local level; (iv) audit conducted by the Implementing Agencies; and (v) Third Party Monitoring (TPM). The Project will build on robust coordination among the three Implementing Agencies.
- The component will finance: (i) general management support for WHO, UNICEF and UNOPS; (ii) hiring of Third-Party Monitoring (TPM) agents, with terms of reference satisfactory to the World Bank, that will complement the existing TPM arrangements for the implementing agencies; and (iii) technical assistance.

Component 4: Contingent Emergency Response (CERC) (implemented by UNICEF, WHO, and UNOPS): The zero-dollar CERC is in place to provide expedited response in case of emergency. There is a probability that an epidemic or outbreak of public health importance or other emergencies may occur during the life of the project, causing major adverse economic and/or social impacts. If this component is triggered, an Emergency Response Operational Manual will be prepared jointly and agreed upon with the World Bank to be used, and the ESMF and Results Framework will be updated to reflect the newly added activities.

The YEHCP is prepared under the World Bank's Environment and Social Framework (ESF). The environmental and social risk classification is Substantial and the risk for sexual exploitation and abuse/sexual harassment (SEA/SH) is rated High.

2. Objective/Description of SEP

The overall objective of this SEP is to define a programme for stakeholder engagement, including public information disclosure and consultation throughout the entire project cycle.

This SEP is prepared jointly by the implementation agencies of the project: United Nations Children's Fund (UNICEF), the United Nations Office for Project Services (UNOPS), and the World Health Organization (WHO).

The SEP outlines the ways in which the above implementing agencies will communicate with stakeholders and includes a mechanism by which people can raise concerns, provide feedback, or make complaints about the project and any activities related to the project. The SEP specifically emphasizes methods to engage groups considered most vulnerable and that are at risk of being left out of project benefits.

The involvement of project beneficiaries is essential to the success of the project to ensure smooth collaboration between project staff and local communities and to minimize and mitigate environmental and social risks related to the proposed project activities. The stakeholder engagement plan is key to communicating the information of project services and scope to all stakeholders and reaching out to disadvantaged and vulnerable groups. Also, in the context of infectious diseases, broad, culturally appropriate, and adapted awareness-raising activities are particularly important to properly sensitize the communities to the risks related to infectious diseases. For WASH, where construction works maybe involved, engagement with affected communities will be done to raise awareness on possible effects of the works and mitigation measures and also sensitize project affected parties on the grievance feedback mechanisms.

3. Stakeholder identification and analysis per project component (details per implementing agency are in Chapter 4)

3.1 Methodology

The involvement of stakeholders throughout the Project's lifecycle is essential to its success. Key stakeholders must not only be informed, but also consulted and provided with the means to contribute to the Project sustainability and raise complaints or provide feedback. The SEP will also help increase buyin of the Project by its stakeholders, ensure a smooth collaboration between Project staff and targeted stakeholders, and address environmental and social risks related to Project activities. In those cases where face-to-face consultations may be restricted because of local authorities' resistance in authorizing the activity, remote or alternative means will be employed.

In accordance with best practice approaches, the implementing agencies will apply the following principles to their stakeholder engagement activities:

- Openness. Public consultations throughout Project preparation and implementation Project lifecycle will be carried out in an open manner, free of external manipulation, interference, coercion, or intimidation. Venues will be easily reachable, and not require long commutes, entrance fees, or preliminary access authorization. Consultation details are available within the subsequent sections in which face-to-face meetings, workshops and virtual meetings were conducted.
- *Cultural appropriateness.* The activities, format, timing, and venue will respect local customs and norms.

- Conflict sensitivity. All project activities will duly consider the complex context of Yemen and refer to the humanitarian principles of neutrality and impartiality.
- Informed participation and feedback. Information will be provided and widely distributed to all stakeholders in an appropriate format and provide opportunities to stakeholders to share feedback and will analyze and address stakeholder comments and concerns.
- Inclusivity. Consultations will engage all segments of the local society, including disabled persons, the elderly, and other vulnerable groups. If necessary, the implementing agencies will provide logistical assistance to enable participants with limited physical abilities and those with insufficient financial or limited transportation means to attend public meetings organized by the Project.
- Gender sensitivity. Consultations will be organized to ensure that both females and males have equal access to them. As necessary, the implementing agencies will organize separate meetings and focus group discussions for males and females, engage facilitators of the same gender as the participants, and provide additional support to facilitate access of facilitators.

In addition, the implementing agencies will ensure that consultations are meaningful. As indicated in ESS10, meaningful consultations are a two-way process that:

- Begins early in the project planning process to gather initial views from the local authorities on the project proposal and inform project design; the findings of the TPM and programmatic visits and the complaints and feedback received by the project stakeholders in the previous financing will also be analyzed to tailor the project to their needs
- Encourages stakeholders' feedback through the above-mentioned mechanisms, including in the identification and mitigation of environmental and social risks and impacts
- Continues on an ongoing basis, as risks and impacts arise
- Is based on the prior disclosure and dissemination of relevant, transparent, objective, meaningful and easily accessible information
- Considers and responds to feedback
- Supports active and inclusive engagement with project-affected parties
- Is free from external manipulation, interference, coercion, discrimination, and intimidation
- Is documented and disclosed

3.2. Affected parties

Affected parties include local communities, community members and other parties that may be subject to direct impacts from the Project. Specifically, the following individuals and groups fall within this category. Disaggregated information on stakeholders per implementation agency is in Chapter 4:

- Health care institutions
- Health services beneficiaries (receivers and providers), including internally displaced persons (IDPs), refugees, women, people living with disabilities, and other vulnerable and disadvantaged groups (ref. to chapter 3.4)
- Communities in the vicinity of planned Project activities
- The local water and sanitation service subscribers, including IDPs, women, people living with disabilities, and other vulnerable and disadvantaged groups.
- Residents, business entities, and individual entrepreneurs in the project that can benefit from the employment, training and business opportunities.
- Community-based groups and non-governmental organizations (NGOs) that represent residents and other local interest groups, and act on their behalf.

3.3. Other interested parties

The project stakeholders also include parties other than the directly affected communities, including (disaggregated information on stakeholders per implementation agency is in Chapter 4):

- Local water and sanitation corporations
- Local branches of Yemen National Water Recourse Authority (NWRA)
- Government of Yemen government officials, permitting and regulatory agencies at the national
 and local levels, including Ministry of Public Health and Population (MoPHP), Ministry of Water
 and Environment (MoWE) and local offices and environmental protection authorities and Ministry
 of Planning and International Cooperation (MoPIC) at both the central and decentralized levels
- The Supreme Council for the Management and Coordination of Humanitarian Affairs and International Cooperation (SCMCHA)
- Residents of the other local communities within the project area (not where the interventions are) who can benefit from employment and training opportunities stemming from the Project.
- Business owners and providers of services, goods and materials within the project area that will
 be involved in the project's wider supply chain or may be considered for the role of project's
 suppliers in the future.
 - Health cluster partners, donors funding the health and nutrition and WASH sectors such as FCDO, GAVI, Kingdom of Saudi Arabia, international NGOs such as IRC, MSF, Save the Children, Other UN agencies (UNFPA, IOM, etc.) that are engaged in WASH, health and nutrition activities in target area

3.4. Disadvantaged / vulnerable individuals or groups¹

Possible barriers to accessing information or other project benefits for beneficiaries include distances, lack of transport money reach the supported health facilities which is mitigated through outreach session, and use of mobile teams and community based cadres as complementary health service delivery mechanisms, lack of access to information technology and electricity (phones or digital/computer equipment to receive information via digital means), illiterate persons, persons with intellectual and physical disabilities, women who's mobility is limited, internally displaced persons/migrants, religious, cultural and linguistic minorities, among others.

The project also translates key information into the local language (Arabic), to cater for majority of population.

Vulnerable groups within the communities affected by the project will be further confirmed and consulted through dedicated means, as appropriate. Description of the methods of engagement that will be undertaken by the project is provided in the following sections.

Within the Project, the vulnerable or disadvantaged groups may include but are not limited to the following per Implementing Agency as per Table 1a, 1b, 1c below:

Table 1a: Stakeholder Matrix by Agency, including vulnerable individuals/groups: UNICEF

UNICEF				
Agency	Broad Activity	Affected Parties		
UNICEF	Provision of minimum service package for PHC functionality	Health workers Community health workers Communities in the vicinity of the health facility People accessing services in the PHCs including: - internally displaced people - women - children - elderly - people living with disabilities District and Governorate health authorities Contractors (e.g., transporters)		
	Community based interventions including services provided by community cadres	Communities served by the community cadres District health authorities Child headed households.		
		Interested Parties		
UNICEF	Provision of minimum service package for PHC functionality	 Ministry of Health Officials at national, governorate and district level The Supreme Council for the Management and Coordination of Humanitarian Affairs and International Cooperation (SCMCHA Other humanitarian agencies withing the same geographic areas as NGOs, INGO and UN agencies Other humanitarian donors funding PHC services partners such as GAVI, FCDO Data collection Traditional and local leaders

4. Stakeholder Engagement Programme

4.1. Summary of stakeholder engagement already conducted during project preparation

Table 2a: Summary of consultation conducted for Original Financing up to Third Additional Financing: UNICEF

Type of engagement/ Message	Timeline	Stakeholders	Summary of discussion
		Original Financing	
Consultations with MoPHP in Sana'a and Aden on the construction of the incinerators Consultation with the health workers in 248 health centres longlisted for the construction of the incinerators, all over the country	September 2022 to June 2023 September 2022 to January 2023	MoPHP directors (Central level authorities) Health workers	Topics discussed: - Agreement on the shortlisted HF where to implement the activity Agreement on the incinerators' design/model and BoQs. Informing them about the upcoming construction works in their health facilities for them to participate in identification of focal persons within the facility and their concerns/ feedback on the works Health workers were informed of the need to raise issues/complaints through the project call centre and also through the DHOS/ GHOS for the attention of UNICEF

Consultation with the community members in catchment areas around the 248 health centres longlisted for the construction of the incinerators, all over the country	October 2022 to January 2023	Community members in catchment area of health facility	 8 consultancy firms were contracted to conduct an assessment in 248 health centres longlisted for the construction of the incinerators. While performing the technical site visit, the firms also consulted the affected stakeholders, after being trained by UNICEF. Topics discussed: Information on the proposed construction of the incinerators. Information on environmental and social risk prevention and management. Concern about final dispose of medical waste and appreciation of the proposed solution. Request for additional training for health personnel on medical waste management. Information on the grievance and feedbacks mechanism.
Meeting with MOPHP to discuss implementation progress during a review meetings	December 2022	MOPHP directors at central level and GHOs and DHOs – separate meetings for Aden and Sanaa	 Implementation progress of EHCP and enrolment of additional health facilities under AF1 for the scaling up of PHC coverage Issues around how to improve timeliness of health worker payments was discussed with an agreement to develop a standard operating procedure outlying roles and responsibilities
Meeting with MOPHP to assess implementation progress	January 2023	Sana'a, Amanat Al-Asemah, Dharma, Amran, Bayda, Marib	Discuss, the training plans for health workers under the projectupdate on payment progress and the need to adhere to the standard list for payments and the standard operating procedure -Facilitation for incinerator assessment
Meeting with MOPHP on supply system strengthening and distribution efficiencies in the northern governorates	March 2023	MOPHP directorates at central level Aden	Review of the Yemen Supply chain system -quantification process -challenges in the health sector supply chain There are inefficiencies in the supply chain and there is need to develop a training plan for MOPHP on supply chain strengthening, assess the LMIS capacity and provide recommendations
Meeting with MOPHP to discuss the distribution system and roles and responsibilities to improve the supply chain	April 2023	MOPH directorates in Sanaa	 Clarity provided on the direct supplies' delivery modality from UNICEF to health facilities The notification procedures for the GHOs and The DHOs and their roles and responsibilities in monitoring and enforcing

system			rationale use of supplies
Meeting with MOPHP to discuss TPM findings	April 2023	MOPHP central level authorities for both Sanaa and Aden	-GHOs oversight on health facility functionality -Adherence to the IPC standards at PHC Findings by governorates shared for MOPHP action
Meeting with MOPHP to check on project inputs during field visit	May 2023	Hodeida, Hajja and Mahweet GHOs	Supplies were in place, and health workers were waiting for their perdiem payments - Health workers informed of the upcoming payments schedule in the first week of June.
Consultation with MoPHP on the AF 2	June 2023	MoPHP Sanaa	Topics discussed: Information on the AF 2 scope and timelines. MOPHP greatly appreciated the continuity of support and proposed scale up on number of supported health facilities and doctors. Requested for more details once discussion progresses
Consultation with MoPHP on the AF2	June 2023	MOPHP Aden	Information on AF2 scope and timelines - Requested for more details once discussion progresses
Coordination meeting with MOPHP, WHO, and WB on AF2	September 2023	MOPHP Aden – (virtual)	Progress on AF2 implementation was discussed with MOPHP appreciating the support and how it had improved service delivery at PHC level.
Meeting with MOPHP on the AF2 Workplan	November 2023	MOPHP Aden- DG PHC, Directors (, Finance, EPI, Family Health, Mental Health, HMIS)	The AF2 workplan including guidelines and expectations were presented. The MoPHP requested clarification of budget breakdown particularly around the cost for TPM which was provided. The need to streamline the payment processes to ensure timely review and feedback on the final payment list was discussed with timelines agreed. Also, PHC kits delivery and communication focal persons was discussed and clarified in response to concerns that the MOPHP central was not always in the loop on PHC kits deliveries.
Meeting with MOPHP-MWM focal point on AF2 workplan	January 2024	MoPHP, Sana'a, Medical Waste Management director	Topics discussed. Construction of the medical waste treatment units and follow-up on the implementation process Medical Waste Management training for the health workers Consultation process and stakeholders' engagement

			The Ministry of Public Health and Population (MoPHP) focal point requested help from UNICEF to lead and supervise the preparation of the national medical waste strategy, which the MoPHP is planning to prepare this year. UNICEF agreed but also asked to involve the WHO in the next discussion to define the responsibilities of each agency in the preparation process.
Meeting with MOPHP-MWM focal point on AF2 workplan	March 2024	Quality control general director	Construction of the medical waste treatment units and follow-up on the implementation process Medical Waste Management training for the health workers Other aspects were also discussed including the supply of PPEs and waste collection containers.

Consultations for Third Additional Financing for UNICEF

Type of engagement/ Message	Timeline	Stakeholders	Summary of discussion
Meeting with MOPHP on possibility of Additional financing 3	March 2024	MOPHP directors at central level (Aden and Sana'a)	Information sharing on the possibility of additional financing 3 and the potential reduction in funding envelope Discussion on the need for prioritisation in the event of reduced funding allocation Agreed to provide continuous updates as more information are received from World Bank
Meeting with MOPHP on the prioritisation for additional financing 3	April2024	MOPHP directors at central level (Aden and Sana'a)	Briefing meeting with authorities on the prioritisation workshop with World Bank, UNOPS and WHO The need to re-prioritise health facilities and the level of support was discussed to fit within the funding envelope
Meeting with FDCO and IRC on the IRC PHC support package and geographic scope in light of AF3 scope	May 2024	FDCO, IRC, and BHA (virtual)	Discussion on possible synergies and areas of support by IRC with new FCDO funding. IRC and EHCP are providing almost the same package of support at PHC. UNICEF and IRC exchanged list of supported PHCs to ensure alignment and to avoid duplication in efforts. This was commended as best practise to be continued in future.
Meeting with MOPHP (northern governorates) to discuss the EHCP funding reduction and prioritisation		Minister of Health, Deputy Minister, Director International relations, EPI director, Finance director, DG Primary health care, Director MNH	Discussion on the need to prioritisation and to explore synergies with other funding partners to mitigate against reduced funding. Discussion of coverage scenarios and updating on ongoing discussions with World Bank.

EHNP HFs/ interviews -	May and	Beneficiaries	The key concerns are:	In-person meeting was held
beneficiaries'	June 2021		1- Some medicines and services are not for free at	
satisfaction survey.			some of the HFs.	
,			2- Some HFs' doctors are not available because there	
			are no salaries.	
			3- Some of the health services need further	
			improvement.	
				· · · · · · · · · · · · · · · · · · ·

			4- Beneficiaries' awareness/information sharing by	
			health workers need to be improved.	
			The project is going to discuss these findings of each area	
			with the health authorities in a more inclusive manner	
			during the next meetings to find suggestions to improve the	
			provision of health services and address these concerns.	
Sana'a/ Meeting	1 Sept 2021	MoPHP	WHO confirmed the upcoming inception of the Yemen	In-person and virtual meeting
			Emergency Human Capital Project (YEHCP), funded by the	was held
			World Bank. This project is the successor to the Emergency	
			Health and Nutrition Project (EHNP), and its main objective	
			is to assure continuity. Despite some differences from the	
			previous project (for example, UNOPS will implement the	
			WASH rehabilitation component of the project), the YEHCP	
			will closely resemble the EHNP	
Sana'a/ Meeting	1 Sept 2021	МоРНР	There might be a need to revise the intervention to best	In-person and virtual meeting
			meet the needs on the ground, and the below points have	was held
			been discussed.	
			Under the YEHCP, there are \$39 million for activities	
			and logistics for one year (\$26 million for hospital	
			support and \$13 million for public health programmes).	
Sana'a/ Meeting	1 Sept 2021	МоРНР	The difference between the two projects, EHNP and	In-person and virtual meeting
			YEHCP, has been explained and discussing that there are	was held
			no activity gaps between the two projects	
Meeting/ Sana'a	1 Sept 2021	MoPHP	The importance of the Social and Environmental	In-person and virtual meeting
			safeguards in the project has been discussed.	was held
			The importance to appoint at least two focal points for this	
			(one for Social Safeguards and one for Environmental	
			Safeguards) within the Ministry to follow this component of	
			the project was raised.	
Health Cluster/ Virtual	August	Health cluster, UN agencies	WHO briefly introduced the project during the cluster	In-person and virtual meeting
Meeting	2021	and INGOs	meeting?	was held
			The health cluster suggested engaging both WHO and	
			UNICEF to avoid duplication of activities with cluster	
			partners.	

Table 2d: Consultations on YEHCP parent and priorities for first Additional Financing

WHO Meeting	Date	Location	Participants	Key findings	Special arrangements for accessibility and inclusivity
WHO with senior MoPHP authorities	8–9 December 2021	Amman	20 government officials 30 WHO staff	YEHCP plan reviewed and supported by authorities	In-person and virtual meeting was held
Health Cluster	4 and 12 January 2022 7–8 February 2022 6 and 17 April 2022	Virtual	70 representatives of partner agencies	YEHCP additional financing components, MSP review, referrals, complementarity and the key environmental and social aspects introduced. More than 15 partners also provided written inputs to the MSP review process as part of YEHCP.	In-person and virtual meeting was held
WHO with MoPHP	22 December 2021, 14 February 2022, 17 March 2022, 5 April 2022	Sana'a and virtual	5 government officials 3 WHO staff	YEHCP plan reviewed, updated and importance of ongoing joint planning emphasized	In-person and virtual meeting was held
WHO with MoPHP	21 February 2022	Aden	6 government officials 4 WHO staff	Key progress and priorities discussed e.g., quality of care, health information, hospital support etc.	In-person and virtual meeting
WHO with UNICEF	17 February 2022	Aden	8 UNICEF staff, 4 WHO staff	Issues discussed include the various areas of support including cholera, PHC, MSP, DHIS2, EHCP, COVID-19, polio, mental health. Agreed on the importance of good partnership together in these areas.	In-person and virtual meeting was held

Table 2e: Consultations on YEHCP parent and priorities for Second Additional Financing

WHO Engagement Type	Date	Location	Participants	Key findings	Special arrangements for accessibility and inclusivity
WHO with MoPHP	12 May 2022	Aden	Vice-Minister and Clinical Services Coordinator	Discussed EHCP implementation and additional financing, mainly the support of NCDs at PHC level and its relevant capacity-building	In-person and virtual meeting was held
EHCP initial briefing and joint planning in Amman	10 August 2022	Amman	1 MoPHP EHCP focal point, 2 WHO staff	Discussed different requests of the MoPHP and their point of view in a number of interventions implemented under the Project AF.	In-person and virtual meeting was held
Aden	23, 24 and 29 August 2022	Aden	1 MoPHP EHCP focal point and emergency director, 3 WHO staff	Discussed the EHCP AF plan, conducting BLS & ACLS trainings in all EHCP hospitals, MoPHP requested support to establish training centres in Aden, Marib and Mukalla, EHCP focal point also requested a regular progress review meeting (across WHO projects) and raised the need to strengthen the referral system.	In-person and virtual meeting was held
Aden	28 August 2022	Aden	5 MoPHP: Minister of Public Health, Deputy Minister Primary Health Care, general manager of the Minister's Office, Communication officer, Curative, 3 WHO staff.	The Minister reiterated the importance of the World Bank partnership and improving coordination by conducting regular meetings. WHO updated the Minister on the remaining balance under EHCP/YCRP and discussed sharing project reports. Discussed ongoing activities such as information management and national and quality strategy. The Minister also requested more support on points of entry, humanitarian-development nexus, and more support for central staff – mainly the admin and finance team and regular field visits by central staff to facilities (supportive supervision/monitoring).	In-person and virtual meeting was held
MoPHP, WHO, UNICEF, and World Bank, first technical coordination meeting	7 September 2022	Virtual	MoPHP, WHO, UNICEF, and World Bank	WHO and UNICEF provided a progress update on EHCP activities and got feedback of the Ministry on the progress of the project and their demands.	In-person and virtual meeting was held
EHCP Progress update meeting	16 Jan 2023	Virtual meeting	45 participants (10 female): 13 MoPHP focal points, 3 UNICEF	Emergency Human Capital Project (EHCP) Progress update meeting of WHO, UNICEF, WB and MoPHP with representation of all technical units involved in implementation of EHCP project.	In-person and virtual meeting was held

			focal points, 18 WHO focal points, 11 WB		
Sana'a authorities, virtual, discussion on EHCP progress, EHCP additional financing, WHO country cooperation strategy development and others	13 June 2023	Sana`a	3 participants (1 Sana'a authorities, 2 WHO) and several members of the health authorities team listening in.	WHO shared updates that EHCP AF2 is in the pipeline for the same activities funded under AF1. The authorities greatly appreciated the project and emphasized the need for fuel support to continue and expand, but they were also opened to shifting to solar alternatives and recognize the need for an exit strategy from fuel. WHO reiterated the importance of social and environmental requirements as prerequisites for activities under EHCP and the authorities agreed to collaborate on enhancing compliance. WHO committed to share the EHCP AF2 proposed budget breakdown for any inputs, along with the planned vs actual expenditures for the parent and AF1. These were shared within two days of the meeting	In-person and virtual meeting was held

Table 2g: Consultations on YEHCP Parent and Priorities for the Third Additional Financing

Briefing to the Health Cluster on the EHCPAF2	52 (37 male, 15 female)	cluster about the EHCP	Authorities highlighted the need to enhance and scale up the support to the health centers by partners	WHO indicated that activities under the second additional fund will be same as in the first additional fund.	In-person and virtual meeting was held
MoPHP officials, INGOs and NGOs and WB colleagues		WHO and UNICEF achievements	complementing the UNICEF interventions ensuring that no		
24 July 2023			duplication in the type of support.		
MoH, Sana`a					

EHCP Technical Mission Technical officers from WB, UNICEF and WHO 10-14 March 2024 Intercontinental Hotel Amman	56 (42 male,14 female)	World Bank appreciated the MoPHP, UNICEF, and WHO for the successful implementation to date and excellent results on the ground.	Discussion topics included system strengthening, supervision and TPM, gender, efficiency gains and prioritization under AF3.	UNICEF and WHO described the EHCP partnership as a good global example of collaboration at national and local levels, on policy and operational issues, which has made the Project so effective. All parties applauded the leadership and strong partnership with the MoPHP.	In-person and virtual
WHO coordination meeting MoPHP senior officials 16 March 2024 Aden & virtual (Hybrid)	30 (25 male, 5 female)	Review of progress in the past two months, including of World Bank projects, and agreement on priorities for the coming two months.	MoPHP colleagues said they have not agreed to shift EHCP public health and preparedness activities to PPRP. They requested that more fuel be provided to CPHLs.	High need to prioritize and document results in a context of increasingly limited funds Discuss further complementarity between PPRP and EHCP considering reduced funding.	In-person and virtual connection
Consultation with health authorities in Sana'a Senior health officials 26 May 2024 Sana'a & virtual (hybrid)	9 (7 male, 2 female)	EHCP budget envelope for AF3, need to prioritize support to hospitals, reduce number of hospitals.	Authorities expressed disappointment with reduced funding and agreed to fast track PPRP, noting UNFPA is supporting MNCH in hospitals so less need to focus on this.	Authorities asked for info on UNFPA activities to share with World Bank	In-person and virtual connection

During project preparation, the following public consultation meetings will be conducted.

Table 3: Planned consultations for preparation of Third Additional Financing

Project stage	Target stakeholders	Topic of consultation / message	Method used	Responsibilities	Frequency/Timeline		
UNICEF							

Project stage	Target stakeholders	Topic of consultation / message	Method used	Responsibilities	Frequency/Timeline
Project Preparation	Other HDP ⁵ actors (e.g., UN agencies, CSO, etc.)	Presentation of the project implementation progress and discussion on project activities (feedback)	Formal virtual meetings	UNICEF	Semi-annually
	Local authorities (both at central and decentralized level)	Implementation progress on AF2 and proposed priorities on programmatic shifts in AF3	Combination of in person and virtual meetings	UNICEF	Quarterly / more frequently depending on need
	Project workers (PHC personnel and employees of the incinerators' construction company)	Waste management practices and consultations over the potential environmental and social risks, including OHS procedures during construction	Face to face meetings	UNICEF and MoPHP	During training – it covers the whole targeted PHC (two Health Workers per each Health Center, and one per each Heath Unit, plus representatives from GHOs and DHOs)
	Project affected communities	Information on services provided by supported health facilities, including referral pathways and grievance and feedback mechanisms	 Face to face consultations, including TPM surveys and FGD. 4.3. Proposed strategy to incorporate the views of vulnerable groups

The project will seek the views of the vulnerable and disadvantaged groups identified through the following methods:

UNICEF

- Women will be engaged in decision-making through community engagement platforms such as mother-to-mother groups with sessions conveniently held at times determined by the group members
- Community Health Workers/Volunteers outreach activities to reach people in remote areas, e and hard to reach through door to door or community engagement / meeting platforms
- Training/capacity building activities for project workers and stakeholders, including awareness activities with training venue selection done in consultation with authorities, trainings delivered in language that is understood by participants and trainings held during the week
- Meetings with field-based project coordinators on quarterly basis to get feedback on issues/concerns raised by vulnerable groups Regular coordination/update meetings with MoPHP both in Sana'a and Aden on a quarterly basis or more frequently as needed
- Regular meetings with MOPHP Governorate Health Offices (GHOs) and District Health Offices (DHOs)
- Regular meetings with Health Development Partners (HDPs) actors, such as cluster working groups
- Visibility material, e.g., flyers, posters, banner
- Social media/digital engagement such as What's App/SMS. Community Health Workers send WhatsApp messages and SMS to the community/beneficiaries to ensure that the messages are received by most of the targeted beneficiaries. This we complement the above with face to face meeting and interpersonal communication.
- Official communications with the local authorities, such as letters, emails, nontechnical summary documents, progress reports
- Grievance and Feedback Mechanism

UNOPS

- WASH Workers/Specialists face to face meetings with the communities
- Training and capacity building activities for project stakeholders, including awareness
 activities with training venue selection done in consultation with authorities, training
 delivered in language that is understood by the participants with feedback questionnaires and
 trainings held during the kickoff induction to contractors. Regular coordination meetings in
 quarterly bases with MWE both in Sana'a and Aden
- Official communications with the local authorities, such as letters, emails, nontechnical summary documents, progress reports
- Grievance and Feedback through Grievance Mechanism

WHO

- Regular Any coordination meetings on a quarterly basis with MoPHP officials in Aden and health authorities in Sana'a
- Regular meetings monthly with GHOs and DHOs and health facility managers during site visits
- Complaints, comments and feedback through the Grievance Mechanism
- Training/capacity-building activities for project workers, training delivered in language that is understood by the participants with feedback questionnaires including awareness activities.

The above measures will ensure to remove obstacles to full and enabling participation for all project stakeholders.²

5. Resources and responsibilities for implementing stakeholder engagement

5.1. Implementation Arrangements and Resources

The implementing agencies and their partners will oversee stakeholder engagement activities. The overall responsibility for SEP implementation lies with the Project Management Unit of the respective agencies.

The stakeholders will be engaged through the methods mentioned under chapters 4.2 and 4.3. The stakeholder engagement activities will be documented through biannual progress reports, TPM reports, and mission discussions/presentations.

The budget estimate for preparing and implementing the SEP is:

- \$ 21,000¹⁰ for UNICEF

Activity	Cost \$US
Stakeholder consultation including sensitisation /orientation of	
GBV/SEA/SH at all levels (national, governorate and district levels –	
through EHCP coordinators and CHW/V platforms (leveraging existing	
budget)	\$ 21,000
Information disclosure including translation, communication, and	
dissemination of visibility materials to raise awareness of project	
activities – integrated in existing ex communications budget line	\$0
Total	\$ 21,000

\$ 25,000 for UNOPS;

Activity Cost \$US

Stakeholder consultation at all levels (national, governorate and district levels – through EHCP coordinators and CHW/V platforms (leveraging existing budget)

¹⁰ In addition to the budget consultations will be integrated with other programmatic activities such as trainings.

Information disclosure including translation, communication and	\$0
dissemination of visibility materials to raise awareness of project	
activities – integrated in existing external communications budget line	
Total	\$ 25,000

As of the parent, AF1, AF2 projects the cost of due diligence for specific sub-projects under the additional fund (preparation of the screening form, consultations, GM, preparation of ESMPs, and monitoring) will be included in the costs/budget for each sub-project. These costs are thus scalable to the level and scope of the potential risks and impacts and might include the costs of consultants recruited by UNOPS or an Implementing Partner to assist on specific tasks.

- \$ 28,600 for WHO

Activity	Cost \$US
Information disclosure; communication, dissemination of visibility	\$ 6,000
materials and awareness-raising on project activities including via GM.	
Stakeholder engagement consultations activities	\$ 20,000
Contingency (10%)	\$ 2,600
Total	\$ 28,600

The call center service for the GM is provided by UNICEF free of cost

6. Grievance Mechanism

A Grievance Mechanism (GM) is a system that allows the project-affected parties to submit not only grievances, but also queries, suggestions, positive feedback, and concerns related to the environmental and social performance of the project, which are reviewed and responded to by the implementing agencies in a systematic manner.

6.1. Description of Grievance Mechanism (GM)

Table 5: Illustrative Table on the GM Steps for UNICEF

Step	Description of process	Timeframe (tentative)	Responsibility
	UNICEF		
GM implementation structure	 The GM includes two components: Grievance collection, whereby complaints and inquiries from beneficiaries, community members and project staff are received and logged into UNICEF's Project Management Information System (MIS). Redressal, whereby the grievances are analysed and acted upon. The data of the complainant is collected when filing the grievance. A complete grievance management workflow has been developed and implemented through the MIS, using tailored MIS modules developed for UNICEF. Project specific grievance categories and types have been defined for each project component, and protocols are in place for grievance collection and redressal. 	Continuous (the GM is functional and is maintained)	 UNICEF case managers UNICEF programme team UNICEF Risk Management Unit (RMU) UNICEF Yemen Service Centre (YSC)
	The entire GM operates under the direct control of UNICEF's Yemen Service Centre (YSC) in collaboration with UNICEF's Health and Nutrition sections. The entire grievance collection and redressal process will be registered and recorded in the MIS and subjected to a comprehensive quality assurance process to ensure the mechanism's integrity, confidentiality and independence.		

Step	Description of process	Timeframe (tentative)	Responsibility
Grievance uptake	 Grievances can be submitted via the following channels: Toll-free telephone hotline: 8004090 operated by YSC. Social media. Written and/or oral communication from a partner (Implementing Partner or vendor). TPM and any site visit conducted by UNICEF or one of its partners. 	Anytime during project duration	Project stakeholdersUNICEF's partnersUNICEF
Acknowledgement and follow-up Sorting, processing	 Any complaint received is logged into the call centre registration system, an index number is assigned, and a category is identified. An immediate notification (acknowledged receipt) is provided to the complainant via SMS, including the index number. If the complaint is related to a serious ESS incident, including GBV/SEA, please ref. to the section at the end of this table, section 6.1.1 	Upon receipt of complaint	 UNICEF case managers UNICEF programme team
Verification, review and action	- The relevant programme focal point conducts fact checking and further follow up, by implementing corrective actions and mitigation measures as relevant, under the oversight of the Head of Section and of the Chief of Field Office.	Within 8 working day	- UNICEF programme team
Monitoring and evaluation	 Data on complaints are collected in the GM Register's Log and followed up by the programme team. The RMU plays a quality assurance role on the monitoring and evaluation of the status of the GM. 	Real timeContinuous (once per week)	- UNICEF programme team - UNICEF RMU
Provision of feedback	 Feedback from complainants regarding their satisfaction with grievance resolution is collected by the call centre agents and the programme focal person after informing the complainant on the resolutions (corrective actions/mitigation measures). TPM will provide further feedback. 	Within 20 working days	- UNICEF case managers - UNICEF programme team
Training	 For project workers (IPs and vendors) at PHC level and at DHO/GHO level 	- Continuous (once per year)	- UNICEF RMU, with UNICEF programme team

Step	Description of process	Timeframe (tentative)	Responsibility
	For Call Centre AgentsFor UNICEF staff	- Quarterly - Continuous (once per year)	
Appeals process	 When/if the complainants are not satisfied with the proposed resolution of the complaint, the complaint will be reopened and the reassessed 	- As applicable	- UNICEF programme team

6.1.1 Management of SEA/SH complaints – and any other serious ESS incident – in UNICEF

SEA/SH¹¹ complaints and all the other serious incidents, including allegations of corruption, extortion claims, etc. can be received through the hotline or through other means, such as: social media (e.g. WhatsApp), written and/or oral communication from a partner (Implementing Partner or vendor), TPM and any site visit conducted by UNICEF or one of its partners.

As soon as an incident is registered/reported, an alert email is immediately sent: i) automatically, through the Management Information System in case the grievance is filed through the hotline; ii) manually, in case it reaches a UNICEF staff via other means.

The recipients of the alert are as follows: the Head of Programme Section, the PSEA Specialist (only for SEA cases), the Head of the Risk Management Unit, the Deputy Representative Programme, the Deputy Representative Operations, and the Representative.

Under the supervision of the Head of Programme Section, the Programme Officer in charge of case management — duly trained on how to interact with the interlocutor — will contact the complainant/survivor. Based on the preliminary information obtained through this first contact, the Head of Programme Section convenes a Case Management Committee, by inviting the Programme Officer in charge of case management, the Head of the Risk Management Unit and the PSEA Specialist (only for SEA cases), to confirm the incident categorization and escalate it to the Representative.

The Representative will therefore report the case to the Office of Internal Audit and Investigation and to the office of the Resident Coordinator/Humanitarian Coordinator/Designated Official; in parallel, the Representative will also clear the notification that the Head of Programme Section will then share with the World Bank, within 48h from learning of the event.

In the meantime, a survivor-centred assistance is provided, upon the survivor's consent. The Programme Officer in charge of case management will maintain regular communications with the survivor to ensure a timely and quality support.

Subsequently, UNICEF will also conduct a programmatic review of the Project, by identifying and implementing the necessary actions to further prevent and manage SEA and GBV related issues.

¹¹

For SH cases, the described process applies only if no UNICEF staff is involved. If a UNICEF staff is involved, please ref. to ESCP.

Table 6: Grievance Mechanism for UNOPS

Step	Description of process	Timeframe (tentative)	Responsibility
	UNOPS		
GM implementation structure	The UNOPS project implementation unit has the main responsibility for the implementation of the GM. The GM Team consists of the UNOPS Environmental and Social Safeguards Specialists, Officers, City Engineers, and GM focal points dotted across the country. The GM will be implemented and monitored by the UNOPS GM Officers Assistants a, who will: (i) receive and process grievances directed to the project; (ii) manage appeals mechanisms; (iii) monitor the implementation of the GM through the Hotline Operator and the IPs; (iv) manage the Hotline Operator; (v) register and file all GM reports; (vi) compile all relevant GM data; and (vii) include reports on the GM in the regular reports to the World Bank. The Specialists are further responsible for the monitoring of GM implementation, and the identification of trends and analysis of the GM reports to be able to flag key issues with Project Management. Each GM Focal Point is responsible for creating awareness of the GM at its locality of operation; roll-out information dissemination; prepare and man help desks at project sites; run a suggestion box in coordination with project's contractors at the project site (nearest office of administration); receive and handle grievances. The UNOPS Environmental and Social Safeguards Specialists will be sharing all necessary information within the project on this matter, and will monitor the project management of the GM, the implementation of help desks at project sites and the handling of grievances by the project. The project should nominate a dedicated officer for the handling and reporting of grievances, the GM Focal Point. As such HSSE Officers, Community GM focal Persons and Community leaders are community level institutions for project management. At the local government level, the Municipality Core Teams, Town Development Committees and Rural Development Committees are set up in rural areas. The National Advisory Committee (NAC) are state level project implementation structures established to provide overall policy and s		
Grievance uptake	Grievances can be submitted via the following channels:		
·	Toll-free telephone hotline: 8000190 operated by GM department		

Step	Description of process	Timeframe (tentative)	Responsibility
	 Short Message Service (SMS) to 739888388 E-mail to grm-yemen@unops.org Letter to Former European Union Office Building, Haddah Street, Sana'a, Yemen In-person at a physical facility (face-to-face during field visit by UNOPS City Engineers and Site Supervisors) Grievance or suggestion boxes located at project sites Social media Tablet/smartphone application Online form 		
Sorting, processing	Any complaint received is forwarded to the Project Manager; logged in the GM Register's Log; categorized according to the following complaint types: Admin, Technical, Safeguarding, Financial, Procurement, PSEA, GBV.	Upon receipt of complaint	Local grievance focal points
Acknowledgement and follow-up	Receipt of the grievance is acknowledged to the complainant by the GM Focal Point.	Within 2 days of receipt	Local grievance focal points
Verification, investigation, action	Investigation of the complaint is led by the Sector Specialist and City Engineers. A proposed resolution is formulated by the Project Manager/Safeguarding Specialist and communicated to the complainant by the GM Focal Point.	Within 10 working days	Complaint Committee
Monitoring and evaluation	Data on complaints are collected in the GM Register's Log and reported to the Project Manager/Safeguarding Specialist every month.		
Provision of feedback	Feedback from complainants regarding their satisfaction with complaint resolution is collected by the GM focal point after informing the complainant on the resolutions (corrective actions).	Within 21 days	
Training	Training is delivered tor staff/consultants in the PIU, Contractors, and Supervision Consultants.		
Appeals process	Cases are closed upon implementation of the resolution; the report on the progress signed by the two parties. Appeals will be handled when there is an update in the case.		

6.1.2 Management of SEA/SH complaints in UNOPS

UNOPS has a very detailed protocol for the referral and report of SEA cases it can be used by GM FPs as well as a summary guidance the GM FPs use it to guide them through the steps to handle SEA Cases, below is also a summary description of UNOPS handling SEA complaints process.

1. Receiving the Complaint:

- The complaint can be submitted through multiple channels, such as a dedicated hotline, email address, web form, or in-person reporting.
- The complaint should be documented carefully, ensuring all relevant details are captured, including the nature of the incident, the parties involved, and any supporting evidence.
- Confidentiality is of the utmost importance, and the identity of the complainant should be protected throughout the process. The GBV Specialist will securely store all case files and documentation separately from GM log, with restricted access to protect survivor privacy.

2. Initial Assessment:

- The complaint is reviewed to determine if it falls within the scope of the organization's SEAH policy and grievance mechanism.
- An initial risk assessment is conducted to ascertain the level of urgency and any immediate actions required to ensure the safety and well-being of the complainant and other affected parties.
- If such cases are reported through the Project GM, the GM Operator needs to report the case within 24 hours to the UNOPS Internal Audit and Investigation Group (IAIG) who will then inform the World Bank within 48 hours following informed consent by the survivor

3. Referral and Assistance:

- Taking the survivor-centered approach into consideration and victim consent, The risk assessment will help determine what assistance may be needed. The/SEA/SH referral system will support survivors in receiving all necessary services they may choose, including medical, legal, counseling, and those cases are reported to the police with informed consent of the survivor, and this can include (but is not limited to) the following:
 - a) Immediate physical protection/removal from danger;
 - b) Immediate contact with services (e.g., health care, social services), and other services as appropriate: In some urgent/extreme situations you may need to consider an immediate call for police involvement and protection;
 - c) Immediate emergency medical attention must be sought if there is a serious or lifethreatening injury – remember the survivor might have sustained injuries that may not be visible.

A survivor has the right to make an informed choice of services. GM, SEA Focal points and service providers should be able to provide comprehensive information about existing referral pathways. When the survivor is referred, explanation on services available and which conditions apply should be thorough.

4. Internal Reporting:

- The GM focal Point and/or the PSEA FP will fill out the report and share it with the investigation Unit.
- The World Bank will be reported within 48 hrs through UNOPS Internal Audit and Investigation Group (IAIG)

5. Investigation:

- A thorough and impartial investigation is conducted, involving interviews with the complainant, the alleged perpetrator, and any relevant witnesses.
- All evidence, including documents, digital records, and physical evidence, is carefully collected and analyzed.
- The investigation is carried out by trained and experienced personnel who are independent of the parties involved.

6. Findings and Determination:

- o Based on the investigation, a determination is made as to whether the complaint is substantiated or unsubstantiated.
- o If the complaint is substantiated, appropriate disciplinary or remedial actions are recommended, in line with the organization's policies and procedures.

7. Reporting and Feedback:

- The survivor is informed of the outcome of the investigation and any actions taken, respecting their confidentiality.
- The organization's leadership and relevant stakeholders are informed of the case and the actions taken.
- Lessons learned from the case are documented to improve the grievance mechanism and SEAH prevention efforts.

8. Follow-up and Support:

- Ongoing support and assistance are provided to the complainant, including access to counseling, medical services, or other necessary resources.
- The organization monitors the situation to ensure the complainant's safety and well-being, and to prevent any retaliation or further incidents.

Table 7: Illustrative Table on the GM Steps for WHO

Step	Description of process	Timeframe (tentative)	Responsibility
	WHO		
GM implementation structure	WHO uses Management Information System (MIS), that is developed and managed by UNICEF, to handle complaints. Clear categories and details of complaints are established, along with a defined process for collecting and resolving them. Grievance Mechanism (GM) has two parts: 1. Complaint Intake: Anyone involved in a WHO project, such as beneficiaries, community members, staff, or partners, can submit a complaint, comment or question. WHO also makes sure health workers and facility managers know about this system by including contact information in all their training materials. Submitted complaints or enquiries are recorded in the MIS according to WHO categories. 2. Resolution Process: Complaints are reviewed and addressed by GM focal point and responsible technical officers.	Ongoing (the GM is functional)	Project management team GM focal point
Grievance uptake	Grievances can be submitted via the following channels: Toll-free telephone hotline: [8004090] operated by [UNICEFF] mailto:yemengrmehcp@who.int E-mail to YEMGRMehnp@who.int Letter to WHO Yemen Country Office In-person at a physical facility during site visits Social media: https://www.facebook.com/WHOYemen, https://x.com/WHOYemen, https://www.instagram.com/whoyemen	During project implementation	Call centre agents (MIS team)

Step	Description of process	Timeframe (tentative)	Responsibility
Sorting, processing	Any complaint received is forwarded to GM focal point; logged in the call centre system (MIS), where it receives a unique identification number categorized according to the following complaint types: 1- Per diem and entitlements of health care workers 2- Transportation cost for caregiver in the TFCs 3- Fees for health services 4- Supplies for health facilities 5- Service quality 6- Labour issues 7- Environmental & OHS issues 8- Inadequate staff conduct 9- GBV and SEAH (see section 6.1.3 below)	Upon receipt of complaint	Call centre agents (MIS team)
Acknowledgement and follow-up	All complaints are entered into the call centre system, given a unique reference number, and categorized according to their complaint type, whereupon they are processed by the GM focal point.	As soon as a complaint is received	Call centre agents (MIS team)
Verification, investigation, action	Grievance is managed by the GM focal point, except for GBV/SEAH entries that are only dealt with by the GBV/SEAH focal point with full confidentiality. GM focal point gathers information about the complainant as needed, analyses grievance and refers it to the responsible technical officer through MIS system, when needed.	Within 10 working days	GM focal point
Monitoring and evaluation	A log of all complaints is maintained in the GM Register. The GM focal point then takes responsibility for following up on each complaint and ensures timely resolution.	Upon receipt of complaint	GM focal point
Provision of feedback	Feedback from complainants regarding their satisfaction with complaint resolution is collected by call centre agents.	Real time	Call centre agents (MIS team)
Training	 For Call Centre Agents For WHO staff For project workers at hospitals and at DHO/GHO level 	Continuous (awareness session integrated into all project trainings)	GM focal point GM focal point GM focal point/PMU staff

Step	Description of process	Timeframe (tentative)	Responsibility
Appeals process	If the complainants are not satisfied with the proposed resolution of the complaint, the complaint will be reopened for further review and investigation.	When appeal occurs	GM focal point

6.1.3 Management of SEA/SH complaints in WHO

Available Channels:

- Toll-free number: 8004090

- Email: yemengrmehcp@who.int and yemgrmehnp@who.int

Steps:

- Anyone who experienced or witnessed SEA/SH can anonymously contact the WHO Grievance Mechanism (GM) to report the incident.
- A trained staff member will record the details confidentially.
- Survivor's consent is obtained for data sharing. The survivor has complete control and decision-making power regarding the next steps. She/he must give specific permission (through a special form) for any information sharing, specifying exactly what is shared, with whom, and why.
- GM operator notifies GBV officer.
- The GBV officer provides emotional support (psychosocial support) and information on available resources. Additionally, the GBV officer can connect survivors with service providers, but only if the survivor agrees (with their consent).

Reporting:

- WHO social safeguards team notifies the World Bank about any GBV/SEAH incident within 48 hours.
- Incident report details are limited to: age/sex of survivor, incident type, perpetrator affiliation, and service referral.

Confidentiality:

- GM operators are trained on confidential and empathetic case collection.
- Only basic details are recorded: nature of complaint, perpetrator association with the project (if known), survivor age/sex (if possible), and support service referral information (if possible).
- Information is stored securely in a separate system accessible only by the GBV officer. Encryption protects the data during transfer and storage.
- Social safeguards team reviews GM's complaint handling.

Investigations:

- Allegations are handled by the Office of Internal Oversight Services, who are mandated to conduct investigations of allegations of sexual misconduct involving WHO or other partners.

This Grievance Mechanism provides a safe and effective system for reporting SEA/SH incidents.

7. Monitoring and Reporting

7.1. Summary of how SEP will be monitored and reported upon (including indicators)

The SEP will be monitored based on both qualitative reporting (based on progress reports) and quantitative reporting linked to results indicators on stakeholder engagement and grievance performance

SEP reporting will include the following:

- (i) Progress reporting on the ESS10-Stakeholder Engagement commitments under the Environmental and Social Commitment Plan (ESCP), this includes on grievance management and the status of grievance resolution and updates provided during implementation support missions
- (ii) Cumulative qualitative reporting on the feedback received during SEP activities, in particular (a) issues that have been raised that can be addressed through changes in project scope and design, and reflected in the basic E&S documentation such as the Project Appraisal Document, Environmental and Social Assessments, , or SEA/SH Action Plan, Security Management Framework, Labor Management Procedures and other plans developed for the project, if needed; (b) issues that have been raised and can be addressed during project implementation; (c) issues that have been raised that are beyond the scope of the project and are better addressed through alternative projects, programs or initiatives; and (d) issues that cannot be addressed by the project due to technical, jurisdictional or excessive cost-associated reasons.
- (iii) Quantitative reporting based on the indicators included in the SEP. An illustrative set of indicators for monitoring and reporting is included in Annex 2.

7.2. Reporting back to stakeholder groups

The SEP will be revised and updated as necessary during project implementation

7.2.1 UNICEF

Summaries and internal reports on consultations, public grievances, enquiries, and related incidents, together with the status of implementation of associated corrective/preventative actions will be collated by responsible programme and risk management staff and referred to the project managers for inclusion into the bi-annual progress reports.

Specific mechanisms to provide feedback to the stakeholders include the following (ref. to chapter 4.3:

- Semi-annual and quarterly meetings convened in person or virtual meetings,
- Regular emails, WhatsApp, calls or formal letters
- Regular visits and meetings through community health workers)
- Third party monitoring visits on quarterly basis
- Programmatic visits by UNICEF staff on a regular basis in selected facilities
- Grievance feedback mechanisms will be used to report back to stakeholders.

Reporting back to the stakeholders will be on an **ongoing basis and through scheduled planning and review meetings**.

It will be the responsibility of the programme management unit (PMU) of UNICEF to ensure that all relevant reporting is shared through the above defined methods. Specifically, the PMU will report back

on the participatory stakeholder engagements in sub-project design and follow up on any agreements made with stakeholders during the consultations. This reporting back to the stakeholders will be undertaken throughout the project, as appropriate and a summary provided in the progress report and during the implementation support missions.

The PMU will gather all comments and inputs originating from community meetings, and GM outcomes. It will prepare summaries, where relevant, of all stakeholder engagements where feasible. The information gathered will help ensure that the project has general information on the perception of communities, and that it remains on target. It will be the responsibility of the PMU to respond to comments and inputs, and to keep open a feedback line to the communities, as well as to the state and county authorities.

7.1.2 UNOPS

- UNOPS will regularly update and monitor the implementation of the Stakeholder Engagement Plan and update the progress reports quarterly.
- UNOPS will periodically submit progress reports with the new updates of the SEP during supervision missions' meetings.
- UNOPS will report back regularly either verbally or in writing to the stakeholders on the previous period during each periodical consultation.
- UNOPS and its Implementing Partners will continue carrying out stakeholder engagement activities and SEP update during the implementation of the project-AF3. The stakeholder engagement activities will continue to be documented through UNOPS' reporting and documentation as part of the project progress reporting requirements.

WHO

WHO strives to involve stakeholders in monitoring activities, as monitoring and evaluation of the stakeholder engagement is recognized as vital to ensuring the project can respond to identified issues.

Adherence to the following characteristics/commitments/activities will assist in achieving successful engagement:

- Sufficient resources to undertake the engagement.
- Inclusivity (inclusion of key groups) of interactions with stakeholders.
- Promotion of stakeholder involvement.
- Clearly defined approaches; and
- Transparency in all activities.

Monitoring of the stakeholder engagement allows to evaluate its efficacy. Specifically, by identifying key performance indicators that reflect the objectives of the SEP and the specific actions and timing, it is possible to both monitor and evaluate the processes undertaken.

The main monitoring responsibilities will be with the project as the management entity of the GM and overall project-related environmental and social monitoring and as implementer of the current SEP. The GM will be a distinct mechanism that will allow stakeholders, at the community level, to provide

feedback on project impacts and mitigation programmes. The ESMF will lay out environmental and social risk mitigation measures, with a dedicated E&S monitoring and reporting plan.

A Third-Party Monitor (TPM) will be engaged by the project on a competitive basis to provide independent operational review of project implementation, as well as verification of all project results. The scope and methodology of the TPM will be agreed with the World Bank, and quarterly monitoring reports will be shared.

Reporting back to stakeholder groups

The current SEP will be periodically revised and updated as necessary during project implementation to ensure that the information presented herein is consistent and is the most recent, and that the identified methods of engagement remain appropriate and effective in relation to the project context and specific phases of the development. Any major changes to the project-related activities and to its schedule will be duly reflected in the updated SEP. Regular summaries and internal reports on public grievances, enquiries and related incidents, together with the status of implementation of associated corrective/preventative actions, will be collated by responsible staff and referred to the senior management of the project. The regular summaries will provide a mechanism for assessing both the number and the nature of complaints and requests for information, along with the Project's ability to address those in a timely and effective manner. Information on public engagement activities undertaken by the Project during the year may be conveyed to the stakeholders in two possible ways:

- Publication of a standalone annual report on parent project and AF's interaction with the stakeholders.
- A number of key performance indicators will also be monitored by the project on a regular basis, including the following parameters:
 - Number of public hearings, consultation meetings and other public discussions/forums conducted within a reporting period (e.g., monthly, quarterly, or annually)
 - Frequency of public engagement activities.
 - Number of public grievances received within a reporting period (e.g., quarterly or annually) and number of those resolved within the prescribed timeline.

Annexes

- Annex 1. Template to capture minutes/records of consultation meetings
- Annex 2. Sample Table: Monitoring and Reporting on the SEP

Annex 1: Template to Capture Consultation Minutes

Topic/purpose of consultation	Stakeholder (group or individual)	Summary of discussions	Date and Location	Follow-up Action/Next Steps; who is responsible; deadlines

Annex 2. Sample Table: Monitoring and Reporting on the SEP
