# **PROJECT PROCUREMENT STRATEGY FOR DEVELOPMENT (PPSD)**

# 1. Project Overview

Completion of the template should focus on describing the details of each of the higher value / risk contracts identified through the application of Supply Positioning as described in the PPSD Preparation and Project Cycle Section of the PPSD Guidance Note. All similar contracts, having similar approaches should be consolidated and described under one heading.

| Country I                      |  |
|--------------------------------|--|
|                                | USA, Domincan Republic, Jamaica, Haiti,  |
|                                | Saint Lucia, The Bahamas, Antigua and    |

|                                | protected areas with                     |
|                                | strengthened management of               |
|                                | biodiversity (hectares).                 |

# 2. Overview of Country, Borrower and Marketplace

#### a. Operational Context

**Governance aspects:** The Project will be implemented as a Recipient Executed Trust Fund (RETF). CI will be responsible for overall implementation, including fiduciary, project M&E and implementation of the project components. The Project Implementation Unit (PIU) will be the CEPF Secretariat, which is hosted by CI on behalf of the CEPF donor partnership with key staff to provide overall coordination of the Project. The PIU will report to and be directly supervised by a Task Team at the World Bank.

Implementation of project activities within the Caribbean Islands Hotspot will be supported by a Regional Implementation Team (RIT), which will help to engage and strengthen civil society organizations (CSOs) through provision of training, technical support and small grants. The RIT will be hosted at the Caribbean Natural Resources Institute (CANARI), a highly experienced institution working with CSOs in the Caribbean based in Trinidad, which acted as the RIT during the initial phase of CEPF investment in the hotspot. The RIT will report to the CEPF Secretariat and receive financial and technical support to bolster its capacity for project implementation. As indicated in the project description, CANARI will support CEPF in implementing various project activities as well, in particular awarding small grants to CSOs.

Implementation of the project will also be supported by a Collaborative Social Accountability Team (CSAT), hosted at the *Instituto Tecnológico de Santo Domingo* (INTEC), an experienced institution in the region, based in the Dominican Republic. The CSAT will report to the CEPF Secretariat, which will provide funding and oversight to INTEC. INTEC will also benefit from co-financing and oversight from the World Bank's Global Partnership for Social Accountability (GPSA) for parallel activities outside the direct scope of the project.

**Economic Aspects:** The proposed project is expected to generate significant benefits streams for selected countries. The magnitude and main types of expected benefits from the project can be divided in two key areas. First, on biodiversity conservation, the project is expected to increase the establishment of new protected areas, areas with improved management or production landscapes with strengthened biodiversity management via CEPF grantees. Second, on CSOs, the project aims to increase technical and financial sustainability to promote conservation and nature-based solutions to climate change.

Activities such as those to be supported by the Project will result in the provision of public goods and services that do not lend themselves easily to private provision. Establishing sound policies for biodiversity conservation and effective sustainable management are primary governance activities that can only be provided by coordinated efforts of the national governments and local authorities; these are essential for sustainable economic development in the selected countries.

**Sustainability Aspects:** The Environment, Natural Resources and Blue Economy Global Practice (ENB) in charge of the project, provides expertise and technical assistance to help low- and middle-income countries manage land, sea and freshwater natural resources in a sustainable way to help create jobs, improve livelihoods, enhance ecosystem services (such as carbon sequestration, pollination or water regulation), decrease pollution and increase resilience to climate change.

**Technological Aspects:** The PIU has modern and adequate systems in place that can provide, with reasonable assurance, accurate and timely information on the status of the funds as required by the Bank.

# b. Client Capability and PIU Assessment

Conservation International (CI), based in 2011 Crystal Dr, Suite 600, Arlington, VA 22202 will administer and implement the project, through the CEPF Secretariat as the PIU. Procurement activities in these implementing agencies will be handled by procurement staff employed by CI. FM functions, including accounting, budgeting, flow of funds, as well as the preparation of financial and disbursement requests to be submitted to the World Bank, will be carried out by the implementing entity's financial management staff who are well qualified and have good experience in managing donor funding, including previous experience with World Bank projects.

**Experience:** Over the past 21 years, CI has managed several projects financed by the World Bank Group. To implement efficiently the project, the Bank support will include: (a) building capacity through some training on Bank's guidelines and tools; (b) reviewing the project operational manual, the procurement plan, and standard bidding documents; and (c) providing timely support

**Need for Hands-on Support:** The project under consideration involves lowvalue contracts. Moreover, procurement activities will be handled by CI under the supervision of the Bank. Thus, hands-on, expanded implementation support shall not be required.

**Contract management capability and capacity:** CI has suitable experience on contract management as it has extensive experience handling similar contracts as those planned for this project.

#### c. Market Analysis

Depending on location, there could be a situation where the pool of suppliers is limited. The technical needs for this project may require international experts. It is not anticipated to be affected by the local market situation.

#### 3. Procurement Risk Analysis

The overall fiduciary risk for this project is assessed as **low** since it builds on an existing program structure (CEPF) and builds on longtime cooperation with the Bank for similar projects. There are no major risks identified regarding procurement, as the project will not finance high-value nor high-risk contracts.

#### 4. Procurement Objective

Major procurement objectives are: (i) to carry out the selection/bidding process in a timely, efficient, transparent manner with an emphasis on fit-forpurpose, quality and value for money, and (ii) to manage signed contracts so as quality deliverables are obtained from their services which in turn will help to meet the Project's Development Objectives.

# 5. <u>Recommended Procurement Approach for the Project</u>

No procurement activity will start before the approval of the procurement plan by the Bank. CI will follow the Bank's Anticorruption Guidelines and will not engage the services of firms and individuals suspended and debarred by the Bank.

CI will prepare the terms of reference (TORs) and bidding documents ahead of the estimated date of issuance mentioned in the approved procurement plan. All TORs for consulting and non-consulting services will be reviewed and cleared by the Bank. CI will submit for the Bank's no objection only bidding documents under prior review.

**Market approach:** Procurement activities will be processed through open competition, and on an exceptional basis through least cost selection. The request including detailed justifications will be submitted to the Bank for any direct selection process. In all cases, the selection method will conform to the procurement plan approved by the Bank.

The type of contracts to be signed with consultants will be based on time spent or deliverables.

- Contract and Estimated Cost: Annual project audit. \$10,000.
- Procurement Approach: Least Cost Selection of an external audit firm will perform the annual specific project audits as required by donors for negotiated fee based on TOR.

# 6. <u>Preferred arrangement for low value, low risk activities (if applicable)</u>

| Contract                   | Category   | Estimated Cost | Procurement<br>Arrangement and<br>Method |
|----------------------------|--|----------------|--|
| Notebook<br>computer       | Category 1 –<br>Goods, non-<br>consulting<br>service,s<br>consulting<br>services,<br>training,<br>operating cost<br>and sub-grants | \$1,703.39     | Direct Selection                         |
| Project financial<br>audit | Category 1 –<br>Goods, non-<br>consulting<br>service,s<br>consulting<br>services,<br>training,<br>operating cost<br>and sub-grants | \$63,000       | Least Cost<br>Selection                  |

#### 7. Summary of PPSD to be inform the Bank's preparation of the PAD

All services required for the Project and to be financed out of the proceeds of the Grant shall be procured in accordance with the requirements set forth in the "World Bank Procurement Regulations for Borrowers under Investment Project Financing" dated December 2019. The provisions of the Recipient's procurement plan for the Project will be updated from time to time in agreement with the Bank. Supervision missions and post procurement reviews will provide the required recommendations to achieve efficient project implementation.
