

### Competitiveness and Enterprise Development Project (CEDP) (P130471)

EASTERN AND SOUTHERN AFRICA | Uganda | Finance, Competitiveness and Innovation Global Practice | IBRD/IDA | Investment Project Financing | FY 2013 | Seq No: 20 | ARCHIVED on 18-Sep-2023 | ISR56907 |

Implementing Agencies: Government of Uganda, Ministry of Finance, Planning and Economic Development, Ministry of Lands, Housing and Urban Development, Private Sector Foundation Uganda

### Key Dates

#### **Key Project Dates**

| Bank Approval Date: 09-May-2013           | Effectiveness Date: 06-Jun-2014          |
|---|--|
| Planned Mid Term Review Date: 25-Jul-2016 | Actual Mid-Term Review Date: 30-Aug-2016 |
| Original Closing Date: 31-Mar-2019        | Revised Closing Date: 30-May-2024        |

#### **Project Development Objectives**

Project Development Objective (from Project Appraisal Document)

The development objective of the project is to improve the competitiveness of enterprises in Uganda by providing support for: (i) the implementation of business environment reforms, including the land administration reform and (ii) the development of priority productive and service sectors.

Has the Project Development Objective been changed since Board Approval of the Project Objective?

Yes

Board Approved Revised Project Development Objective (If project is formally restructured)

To support measures that facilitate increased private sector investment in the tourism sector and strengthen effectiveness of the land administration system.

Land Administration Reform:(Cost \$107.70 M) Business Registration and Business Licensing Reforms:(Cost \$10.00 M) Tourism Development Initiatives:(Cost \$68.10 M) Matching Grant Program for MSMEs:(Cost \$8.00 M) Project Implementation:(Cost \$6.00 M)

## **Overall Ratings**

| Name                                 | Previous Rating         | Current Rating            |
|--------------------------------------|-------------------------|---------------------------|
| Progress towards achievement of PDO  | Moderately Satisfactory | Moderately Satisfactory   |
| Overall Implementation Progress (IP) | Moderately Satisfactory | Moderately Unsatisfactory |
| Overall Risk Rating                  | Moderate                | Substantial               |

### Implementation Status and Key Decisions

Momentum for implementation in the tourism component continues to grow and progress is seen in the processing and delivery of key activities. Progress in the land component is stalled as key contracts for the component are yet to be signed. Speedier implementation of approved activities is needed to further advance progress towards key results.

The tourism component disbursement rate is at 59% and the civil works are delayed significantly. The civil works under tourism are the activities most at risk. A highly ambitious civil works' roadmap has been provided by the PIU. It appears unlikely that the planned activities can be concluded in time, given the past performance where there have been delays in procurement processes and during construction. It would be advisable to revise the civil works planned under the component and reallocate financing to the activities that are more advanced. For activities that may be initiated during the Project but are not completed within the timeline, the government would need to provide the remaining budget for completion.

The Tourism Enterprise Support Fund (TESF) was successfully launched, and more than 200 applications were received for the first call for proposals. This high demand highlights the need for technical and financial support for tourism enterprises in Uganda. The review of the 233 applications was undertaken and 41 were successful and awarded grants by the Grants Review Committee. A total of 19 applicants have since signed agreements for implementation of activities. The first call for proposals did not meet its objectives in terms of reach, geographical distribution and sector impact. The TESF manual and criteria are being redesigned to enhance their effectiveness and national outreach and ensure value for money in collaboration with an international consultant.

Since the last ISM, contracting and procurement for the land component advanced considerably with almost USD 40m of funds (78 % of the Component amount) at an advanced stage of procurement though contracts have not yet been signed. As the previously agreed end of April 2023 deadline to finalize key contracts was not met, the PIU conducted negotiations for key contracts such as Systematic Land Adjudication and Certification (SLAAC), National Land Information System (UgNLIS), Land Valuation Management System (LAVMIS) and Ugandan Geodetic Reference Framework (UNGRF) to adjust their duration and scope to enable their completion before Project closing date.

The SLAAC activity is advancing slowly, and achievement of 800,000 titles is at high risk of non-completion. The recruitment and deployment of the Data Processing Center (DPC) staff to be deployed in the Department of Survey and Mapping and into the Ministry Zonal Offices (MZOs) is delayed, which also explains low progress in the ongoing SLAAC activity with only 10,000 titles issued out of 800,000 expected by the end of the Project.

The indicators in the results framework are updated annually in June and updates are provided where available in this ISR.

#### Risks

#### Systematic Operations Risk-rating Tool

| Risk Category   | Rating at Approval | Previous Rating | Current Rating |

|                          | -                        | eved at 99%. The end target h | •                |             |

Comments:

Substantially achieved at 99%. The end target has been set up lower than the baseline to factor in Covid19 pandemic and corresponding dramatic decrease of tourists during 2020-2021. Tourism sector is experiencing a steady recovery in 2023. There should be a discussion with PSFU PIU whether to adjust the baseline or the target value.

### **Overall Comments**

Both PIUs should endeavor to clarify methodology of indicators' measurement and improve consistency and frequency of their reporting. Some of the indicators have not been updated since 2020. As of September 11, 2023 out of 9 PDO-level indicators only 2 are achieved and 2 are substantially achieved with a good probability to achieve 8 out of 9 by the Project Closing date. The indicator on direct Project beneficiaries cannot be achieved without significant acceleration of SLAAC activity implementation. The Project so far achieved 4 Intermediate Results Indicators (IRI) and substantially achieved 3, out of 16. Several of the IRI for land component are at high risk of not being achieved, considering current slow progress of the SLAAC activity and delay with recruitment of additional contractors' and consultants.
