Procurement

General

1. Procurement for the project would be carried out in accordance with the World Bank's "Guidelines: Procurement of Goods, Works, and Non-Consulting Services under IBRD Loans and IDA Credits & Grants" dated January 2011 (revised July 2014); and "Guidelines: Selection and Employment of Consultants under IBRD Loans and IDA Credits & Grants by World Bank Borrowers" dated January 2011 (revised 2014); and the provisions stipulated in the Loan Agreement. The World Bank Guidelines on Preventing and Combating Fraud and Corruption in Projects Financed by IBRD Loans and IDA Credit and Grants dated October 15, 2006 and revised on January 2011, would also apply.

Procurement arrangements and capacity assessment

2. The RGA, under the MCTI, would be the main implementing agency. This agency has already implemented the RECRP. A PIU would be established, which would report directly to the Director General of RGA. The PIU would be responsible for all procurement procedures under the project, supported from at least one full-time procurement officer for all procurement. The PIU Director and technical staff have some experience in World Bank procurement, but this is rather limited. A procurement officer experienced in WB procurement would be hired for the needs of the project, and would work in close coordination with the PIU team. The PIU would be supported also by a procurement assistant, as needed. In addition, technical staff from relevant departments within RGA which might be called on sitting in evaluation committee would be trained on their specific role and general principles of Bank procurement rules.

3. A detailed Project Operational Manual (POM) has been prepared based on previous versions used for RECRP and it was reviewed by the Bank. It would be further revised before the project starts. The manual includes procurement methods to be used in the project along with their step-by-step explanation as well as the standard and sample documents to be used for each method, and service standards, responsibilities and accountability of PIU staff and management for carrying out the activities. The procurement staff and all potential members of tender (or bid evaluation) committees would attend the project launch workshop that would be organized by the Bank staff following the signing of the loan agreement. Further, the Bank team would help the project coordinator identify suitable training courses for the PIU existing team.

4. **Risk Mitigation:** The following measures were agreed to mitigate the risks and maintain the implementing team's capacity.

Table 2: Summary Risk Assessment

Ri	Risk Mitigation				
•	Limited procurement capacity of the PIU and insufficient knowledge of Bank's procurement and consultant guidelines may delay selection/bidding process and contract management	 RGA will hire a PIU procurement expert with experience in World Bank financed projects/international procurement. Selection of the procurement expert is a condition of effectiveness. 			
•	Unsatisfactory quality of technical designs/ToRs may lead to delays in contract implementation and to contract amendments	 Preparation of draft technical specifications /terms of reference before project effectiveness, at least for the contracts for which the selection process is to take place in the first 12 months of the project implementation; Close involvement of Bank technical expert in the review of the TOR/ TS and designs; Bank prior review of critical packages/ assignments. 			
•	PIU might be initially overwhelmed with the number of the consultants and/or size of contracts to procure and implement	 Recruitment of key staff after loan signing so that ToRs, technical specifications and bidding documents can be prepared early on. Strengthening PIU's procurement, technical and contract administration capacity via workshops. The packages in the procurement plan will be sequenced and phased to allow sufficient time for bidding, evaluation and Bank review. 			
•	The public officials/technical staff, who will be involved in project procurement through tender committees, may not be familiar with the applicable procurement procedures, and may slow down the procurement process	 Technical staff from relevant departments within RGA will be previously trained on their specific role and general principles of Bank procurement rules; Operations Manual will set out the service standards, responsibilities and accountability of PIU staff, technical staff management for carrying out the activities. Furthermore, the Bank team will help the project coordinator identify suitable training courses for the PIU team; The order for appointment of evaluation committees shall specify the timeframe by which the evaluation and recommendation of award; 			

Risk	Mitigation				
 Insufficient technical capacity within the supervision or other departments on RGA may cause contract supervision delays related to implementation and poor quality of goods, works and services. 	 Adequate consulting services and technical assistance, training, knowledge exchange would be provided under the project Component D, as needed; Intensive and close supervision by Bank technical team and procurement accredited staff in particular; 				
 Insufficient knowledge of the latest Procurement and Consultants Guidelines (January 2011) 	 PIU staff, and especially the Procurement Expert would attend procurement training organized by the Bank The Bank's Procurement Specialist assigned to the project has provided the PIU with a full set of the relevant, most recent procurement documents, including but not limited to standard and sample bidding documents, proposal formats, evaluation report documents, etc. 				

The Procurement Plan

5. The Borrower, at appraisal, finalized the procurement plan for project implementation, prepared during preparation phase, which provides the basis for procurement methods. It includes the Bank review requirements and thresholds. The procurement plan would be reviewed and agreed between the Borrower and the Bank during negotiations. It would be available as a separate project document at the office of the PIU, and on the Bank's external website. The Procurement Plan would be updated in agreement with the Bank as required to reflect the actual project implementation needs.

Procurement of Goods, Works and Non-Consulting Services

6. The following methods may be used for procurement of goods, works and non-consulting services as agreed in the procurement plan: International Competitive Bidding (ICB), National Competitive Bidding (NCB), Shopping (S), and Direct Contracting (DC).

Procurement of Works

7. Works procured under this project would include construction and rehabilitation of buildings and putting up concrete markers on part of or all the territory of the country, for the leveling grid stabilization. Procurement will be done using the Bank's Standard Bidding Documents (SBD) for all ICB and NCB packages. Prequalification would not be used at all, regardless of the size of civil works contracts. Minor works, as relevant, could use Invitation to Quote (ITQ) for Works acceptable to the Bank for contracts less than or equal to EUR 85,000.

Procurement of Goods and Non-Consulting Services

8. Goods and non-consulting services to be procured would include IT systems, furniture, IT equipment (hardware and software), purchase of vehicles for motorized levelling, measurements for the REC, gravity meter equipment, measurement of altitude differences and grid stabilization, data acquisition and improvement. Procurement for all ICB procedures would be done using the Bank's SBDs. Smaller value contracts, as needed, would be procured using harmonized NCB documents for Goods or shopping using ITQ (June 2011), depending on the cost estimate for the package. The standard documents for supply and installation of information systems would be used for the procurement of the software development phases and roll out. Software maintenance for the control center will be procured through direct contracting considering the equipment already in use works with particular software (provided only by one supplier) and any new software would require changes of the whole equipment which is not feasible and costly.

Selection of Consultants

9. Consultant services will include preparation of quality assurance system and data manual, data verification and analysis and modeling, preparation of corporate and business planning, individual consultants for entering of backlog data, map conversion and utility map conversion, capacity building, awareness raising and knowledge transfer, updating the ICT strategy. Multiple individual consultants/technical staff will be hired under the project for the entry of data. A sample contract for hiring of these individuals will be cleared by the Bank and used during the project.

10. The following methods may be used for the selection of consultants: Quality and Cost-Based Selection (QCBS), Quality-Based Selection (QBS), Least-Cost Selection (LCS), Fixed Budget Selection (FBS), Selection based on Consultants Qualifications (CQS), Individual Consultant Selection (IC), and Single Source Selection (SSS). The World Bank's Standard Request for Proposals will be used. All Terms of Reference, irrespective of prior/post review status, are subject to Bank's review and no objection.

Training and Training Plan

11. The institutions providing standard training, conducting seminars and organization of study tours would be selected on the basis of analysis of the most suitable program of training offered by the institutions, availability of services, the period of training and the reasonableness of cost. However, consultants hired to deliver training under the Project would be selected in accordance to the selection methods as stipulated in the *Consultant Guidelines* applicable to the project. An annual training plan would be prepared and agreed with the Bank. It would include information on the title

of training, institution that would provide it, and timeline, cost, number, position and names of relevant people to be trained. The training plan would be updated in agreement with the Bank through the duration of the Project at least annually or as required to reflect the actual project implementation needs.

Operating Costs

12. The activities to be financed by the project (as defined in the Loan Agreement) would be procured using the implementing agency's administrative procedures, which were reviewed and found acceptable to the Bank.

Post-review Percentages and Frequency.

13. Contracts not subject to Bank's prior review would be subject to post review by the Bank's procurement specialist assigned to the project. Post review of contracts will be carried out once per year. At a minimum, one out of five contracts will be randomly selected for post review. Physical inspection will be conducted for at least 10 percent of the contracts.

General Procurement Notice

14. The GPN for the Project will be published in the UN Development Business after loan negotiations.
