Implementation Status and Key Decisions

The project is in its tenth year of an eleven-year implementation schedule and key project activities have been finalized. The road works are completed, the fuel truck and fire tender have been delivered and are in use, and the new terminal opened in February 2018. In addition, works on the construction of the flight services center/fire tender shelter have now been completed. The GoTv is receiving regular revenue from the Safety and Security Levy as well as the higher departure tax, both collected by Fiji Airways as part of the ticket price. Furthermore, an additional finance was approved in November 2018 which has supported Tuvalu's participation in ICAO, as well as activities related to Gender-based Violence (GBV) and Violence Against Children (VAC) training, prevention and support. In addition, the implementation of the Wildlife Management plan is progressing slowly.

There have been a number of challenges affecting the project, particularly with regards to the failures on runway and apron surface, and the navigation aids. A solution has been found to address these surface failures. Since the November 2019, the project has experienced meaningful progress, most notably the completion of remedial works on the apron. The bidding process for runway remedial works has experienced delays due to unresponsive bids. The retendering process was further delayed as a result of the COVID-19 pandemic. In light of the COVID-19 pandemic, the World Bank has granted an extension of the project closing date to December 15, 2022.

An additional financing to complete the remaining runway repair works, has been approved by the World Bank Board in September 2021. The tendering process is ongoing; contract award is expected within first quarter of 2022 (third quarter FY21)
