Project Development Objectives

Project Development Objective (from Project Appraisal Document)

The higher order objective for the eight years' program is 'Improving the quality of General Education (Grades 1-12) throughout the country'. The specific PDO for GEQIP II is 'Improving learning conditions in primary and secondary schools and strengthening of institutions at different levels of educational administration'.

Has the Project Development Objective been changed since Board Approval of the Project Objective?

Implementation Status and Key Decisions

The main achievements of the project include the following.

1. **Textbook availability and utilization:** One of the intermediate indicators is to deliver 120 million copies of textbooks and supplementary materials to '0' class-Grade 12. A total of 177 million copies of textbooks, teachers' guides and supplementary materials have been procured or are under procurement. Of this, about 125 million copies of reprints and mother tongue textbooks have been distributed to regions and woredas (districts) for onward distribution to schools; 52 million copies are under printing or distribution. The project has introduced supplementary materials to reinforce knowledge and skills learned in class; and supported textbooks in seven mother tongues and braille for the sight impaired to promote equity in education. This has improved the ratio of primary school students to newly procured mother tongue textbooks from 1:0 to 1:0.74. which is close to the target of 1:1. While the national average is close to the target, there are variations across regions and schools. Visits to several regions showed that there were serious shortages in some schools and grades. The field trips also revealed poor storage of textbooks; failure to distribute textbooks to students; and lack of understanding by school principals, teachers and students on how to manage, utilize and care for teaching learning materials. In addition, textbook availability has not been matched with their effective use in classrooms. The 2018 textbook survey confirmed that on average only 31% of students brought their textbooks to classes (against the target of 90% for mathematics and 70% for science and social science). MoE has communicated the findings to regions and requested them to take actions to improve distribution and utilization. Whether measures taken by MoE and regions have improved the situation will be reviewed before the project closes.
2. **Increase in the number of teachers with required qualifications and competence:** A total of 83,309 primary teacher trainees and 24,856 secondary teacher trainees graduated from diploma and post-graduate diploma teaching programs during the project period. 106,063 in-service primary teachers completed their upgrading programs from certificate to diploma, and 59,069 secondary teachers from bachelor degree (in non-teaching fields) to PGDT. In addition, 70,226 in-service English language teachers, and 27,811 mathematics and science teachers attended short-term training programs as part of their continuous professional development. In all cases, achievements have exceeded the targets.
3. **Teacher effectiveness:** Data based on 21,363 re-inspected schools on school inspection standards including teaching and assessment practices show that the index of teacher effectiveness has improved from the 2016 baseline of 45.4% in Level 1 and 59.3% in Level 2 schools to 46.4% in Level 1 and 59.5% in Level 2 schools in 2018.
4. **School grants utilization:** The 2016 school grant utilization survey confirmed that 100% of the schools surveyed (38,425) had used at least half of their grants for teaching and learning domain of their school improvement program (SIP). However, the 2018 grant evaluation survey confirmed that only about 74% of the schools surveyed (41,835) did so.
5. **ICT in education:** After a long delay, e-cloud infrastructure (involving a server connected to 80 terminals) has been installed in 300 secondary schools and 10 universities to provide ICT-enabled quality learning. Efforts to hire a consultant to design and implement Learning Management System for schools that offers online instruction were not successful. Instead, MoE collected digital video contents from on-line resources and customized them in line with existing curriculum, which is hosted on the local server of schools to be accessed by students and teachers.
6. **Reduction in dropout rate in grade 1:** There was some improvement in the dropout rate although it was below the target. It decreased from the baseline value of 25% in 2011/12 to 19.49% in 2017/18, against the 17% target.
7. **Increasing the percentage of Level 1 and Level 2 schools that have moved up to the next level:** Based on 34,126 schools inspected between 2013/14 and 2015/16, 25.6% of the schools were classified as Level 1 and 64.1% (Level 2). A re-inspection of 21,363 schools in 2016/17 and 2017/18 showed that 57.5 % of level 1 schools have moved to Level 2 or Level 3 and 8.5% of Level 2 schools have moved to Level 3 against a target of 10% and 5% respectively.
8. The closing date of the project has been extended three times: from July to December 31, 2018; to June 30, 2019; and lastly to December 31, 2019 to enable the government to complete the delivery of G1-8 adapted mother tongue, G9-12 braille, and G5-8 Amharic textbooks as a second language for Oromiya, G1-8 English textbooks, and ICT infrastructure.
