

# Gujarat

## Gender

Women in Gujarat record mixed progress. Maternal health, already better than in most other states, is improving. And, today, more of Gujarat's girls are in school. Nonetheless, the ratio of girls to boys in the state is among the lowest in the country. Secondary school attainment among adult women is close to the national average, but it remains below many other advanced states. While farming dominates employment for both men and women in rural areas, urban men have more salaried jobs than urban women. What's more, women have withdrawn from the labor force in large numbers after 2005.

### Child sex ratio in Gujarat is among the lowest in the country

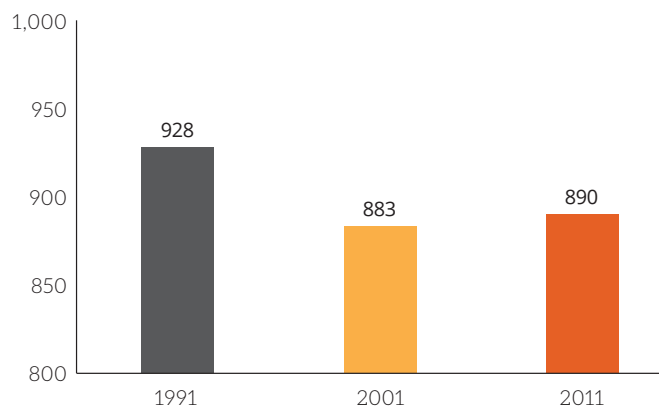

Child sex ratio, 2011 (age 0-6)  
females per 1,000 males
