Project Development Objectives

Project Development Objective (from Project Appraisal Document)

The Project Development Objective is to (i) improve delivery of irrigation and drainage services in selected areas and (ii) developimproved policies and procedures as a basis for a national program of land registration.

Has the Project Development Objective been changed since Board Approval of the Project Objective?

Yes

Public Disclosure Authorized

Board Approved Revised Project Development Objective (If project is formally restructured)

The Project Development Objectives are to: (a) improve delivery of the irrigation and drainage services in selected areas; and (b) develop improved policies, procedures, and systems as a basis for a national land management program.

Components Table

Name

Component 1 Irrigation and Drainage Improvement:(Cost \$54.85 M)

Component 2 Land Market Development: (Cost \$12.56 M)

Component 3 Project Management: (Cost \$3.02 M)

Implementation Status and Key Decisions

The Project became effective in March 2015. Implementation Progress to date remains Moderately Satisfactory despite good progress made in several areas, e.g. construction works, strengthening of irrigation and drainage institutions, and the piloting of systematic land registration procedures. Progress towards achievement of PDO for section (b) "develop improved policies, procedures, and systems as a basis for a national land management program" is satisfactory as the choice to use an in-house approach for systematic registration in priority areas agreed during the mission will offer control and flexibility to cope with COVID 19. The situation is more complicated for component 1 (improve delivery of the irrigation

12/29/2020 Page 1 of 10

and drainage services in selected areas) because of a possible budget gap to finance all the planned irrigation schemes. This should be clarified in the course of January. COVID-19 could potentially affect the implementation pace of the plan to establish WUOs, which is by nature participatory.

Comments:

The reported number of water user represents only those with a formal delivery contract with GA. This number constitutes an estimated 28 percent of all water user provided with irrigation and drainage services in the project schemes. The total number of water users is expected to rise as rehabilitation works of the secondary and tertiary levels evolve.

Previous number of female water users has been reported incorrectly. The actual number of female users constitute about 18% of the total number of water users with formal contracts with GA.
