Acknowledgments

The Little Data Book on Information and Communication Technology 2010 is the result of close collaboration between the staff of the Development Data Group of the Development Economics Vice Presidency and the Global Information and Communication Technologies Department of the World Bank. The Development Data Group team included David Cieslikowski, Richard Fix, Buyant Erdene Khaltarkhuu, Alison Kwong, Raymond Muhula, and William Prince. The Global Information and Communication Technologies team included Meraj Allahrakha, Kaoru Kimura, Marta Priftis, and Christine Zhenwei Qiang. We would also like to acknowledge the cooperation of the International Telecommunication Union on the use of its data. The work was carried out under the management of Shaida Badiee and Mohsen Khalil. Meta de Coquereaumont, Christopher Trott, and Elaine Wilson of Communications Development Incorporated provided design, editing, and layout. Staff from External Affairs oversaw publication and dissemination of the book.

Preface

Since the late 1990s access to information and communication technologies has seen tremendous growth—driven primarily by the wireless technologies and liberalization of telecommunications markets. Mobile communications have evolved from simple voice and text services to diversified innovative applications that reach more than 4 billion people globally, including people in remote and rural areas. The number of Internet users has risen constantly and now tops 1.6 billion people, with the number of broadband connections up to 400 million in 2008.

The impacts of information and communication technologies cross all sectors. Research shows that investment in information and communication technologies is associated with such economic benefits as higher productivity, lower costs, new economic opportunities, job creation, innovation, and increased trade and exports. Information and communication technologies also help provide better services in health and education and strengthen social cohesion.

The Little Data Book on Information and Communication Technology 2010 charts the progress of this revolution for 210 countries around the world. It provides comparable statistics on the sector for 2000 and 2008 across a range of indicators, enabling readers to readily compare countries.

This book includes indicators covering the economic and social context, the structure of the information and communication technology sector, sector efficiency and capacity, and sector performance related to access, usage, quality, affordability, trade, and applications. The *Glossary* contains definitions of the terms used in the tables.

For more information about these data or other World Bank data publications, visit our data Web site at data.worldbank.org or the Web site of the Global Information and Communication Technologies Department at www.worldbank.org/ict.

Data notes

The data in this book are for 2000 and 2008 or the most recent year unless otherwise noted in the table or the *Glossary*.

- Growth rates are proportional changes from the previous year unless otherwise noted.
- Regional aggregates include data for low- and middle-income economies only.
- Italics indicate data for years or periods other than those specified.

Symbols used:

- .. indicates that data are not available or that aggregates cannot be calculated because of missing data.
- 0 or 0.0** indicates zero or small enough that the number would round to zero at the displayed number of decimal places.
- \$** indicates current U.S. dollars.

Data are shown for economies with populations greater than 30,000 or for smaller economies if they are members of the World Bank. The term *country* (used interchangeably with *economy*) does not imply political independence or official recognition by the World Bank but refers to any economy for which the authorities report separate social or economic statistics.

Regional tables

The country composition of regions is based on the World Bank's analytical regions and may differ from common geographic usage.

East Asia and Pacific

American Samoa, Cambodia, China, Fiji, Indonesia, Kiribati, Democratic Republic of Korea, Lao People's Democratic Republic, Malaysia, Marshall Islands, Federated States of Micronesia, Mongolia, Myanmar, Palau, Papua New Guinea, Philippines, Samoa, Solomon Islands, Thailand, Timor-Leste, Tonga, Vanuatu, Vietnam

Europe and Central Asia

Albania, Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina, Bulgaria, Georgia, Kazakhstan, Kosovo, Kyrgyz Republic, Latvia, Lithuania, Former Yugoslav Republic of Macedonia, Moldova, Montenegro, Poland, Romania, Russian Federation, Serbia, Tajikistan, Turkey, Turkmenistan, Ukraine, Uzbekistan

Latin America and the Caribbean

Argentina, Belize, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Dominica, Dominican Republic, Ecuador, El Salvador, Grenada, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname, Uruguay, Bolivarian Republic of Venezuela

Middle East and North Africa

Algeria, Djibouti, Arab Republic of Egypt, Islamic Republic of Iran, Iraq, Jordan, Lebanon, Libya, Morocco, Syrian Arab Republic, Tunisia, West Bank and Gaza, Republic of Yemen

South Asia

Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka

Sub-Saharan Africa

Angola, Benin, Botswana, Burkina Faso, Burundi, Cameroon, Cape Verde, Central African Republic, Chad, Comoros, Democratic Republic of the Congo, Republic of Congo, Côte d'Ivoire, Eritrea, Ethiopia, Gabon, The Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mayotte, Mozambique, Namibia, Niger, Nigeria, Rwanda, São Tomé and Príncipe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, Sudan, Swaziland, Tanzania, Togo, Uganda, Zambia, Zimbabwe

World

	2000	2008
Economic and social context		
Population (millions)	6,085	6,697
Urban population (% of total)	47	50
GNI per capita, <i>World Bank Atlas</i> method (\$)	5,264	8,654
GDP growth, 1995–2000 and 2000–08 (avg. annual %)	3.2	3.1
Adult literacy rate (% ages 15 and older)	78	82
Gross primary, secondary, and tertiary enrollment (%)	64	68
Structure		
Separate telecommunications regulator		
Status of main fixed-line telephone operator		
Level of competition (competition, partial comp., monopoly)

Income group tables

For operational and analytical purposes the World Bank's main criterion for classifying economies is gross national income (GNI) per capita. Every economy in *The Little Data Book on Information and Communication Technology* is classified as low income, middle income, or high income. Low- and middle-income economies are sometimes referred to as developing economies. The use of the term is convenient; it is not intended to imply that all economies in the group are experiencing similar development or that other economies have reached a preferred or final stage of development. Classification by income does not necessarily reflect development status.

Low-income economies are those with a GNI per capita of \$975 or less in 2008.

Middle-income economies are those with a GNI per capita of more than \$975 but less than \$11,906. Lower-middle-income and upper-middle-income economies are separated at a GNI per capita of \$3,855.

High-income economies are those with a GNI per capita of \$11,906 or more.

Euro area includes the member states of the Economic and Monetary Union of the European Union that have adopted the euro as their currency: Austria, Belgium, Cyprus, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Malta, Netherlands, Portugal, Slovak Republic, Slovenia, and Spain.

Low income

	2000	2008
Economic and social context		
Population (millions)	825	976
Urban population (% of total)	26	29

Country tables

China

Data for China do not include data for Hong Kong SAR, China; Macao SAR, China; or Taiwan, China.

Cyprus

GNI and GDP data and data calculated using GNI and GDP refer to the area controlled by the government of the Republic of Cyprus. For more information, see *World Development Indicators 2010* or data.worldbank.org.

Kosovo, Montenegro, and Serbia

Montenegro declared independence from Serbia and Montenegro on June 3, 2006. Where available, data for each country are shown separately. However, some indicators for Serbia prior to 2006 include data for Montenegro. Moreover, data for most indicators for Serbia from 1999 onward exclude data for Kosovo, which in 1999 became a territory under international administration pursuant to UN Security Council Resolution 1244 (1999). Kosovo became a member of the World Bank on June 29, 2009, and its data are shown where available.

Moldova

GNI and GDP data and data calculated using GNI and GDP exclude Transnistria. For more information, see *World Development Indicators 2010* or data.worldbank.org.

Morocco

GNI and GDP data and data calculated using GNI and GDP include Former Spanish Sahara. For more information, see *World Development Indicators 2010* or data.worldbank.org.

Tanzania

GNI and GDP data and data calculated using GNI and GDP refer to mainland Tanzania only. For more information, see *World Development Indicators 2010* or data.worldbank.org.

Glossary

Adult literacy rate is the percentage of people ages 15 and older who can, with understanding, read and write a short, simple statement about their everyday life. (United Nations Educational, Scientific, and Cultural Organization Institute for Statistics)

E-government Web measure index measures the level of sophistication of a government's online presence based on four stages of e-government evolution: emerging presence, enhanced presence, transactional presence, and connected presence. A value of 0 indicates the lowest presence, a value of 1 the highest. (United Nations Department of Economic and Social Affairs and United Nations Public Administration Network)

Fixed broadband Internet access tariff is the lowest sampled cost per 100 kilobits per second per month calculated from low- and high-speed monthly service charges. Installation fees or modern rentals are excluded. (International Telecommunication Union)

Fixed broadband Internet subscribers are users of the Internet who subscribe to paid high-speed access to the public Internet using a digital subscriber line, cable modem, or other high-speed technology. High-speed access is at least 256 kilobits per second in one or both directions. (International Telecommunication Union)

GDP growth is the annual percentage rate of growth of gross domestic product (GDP) at market prices based on constant local currency. Aggregates are based on 2000 U.S. dollars. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. (World Bank and Organisation for Economic Co-operation and Development)

GNI per capita, World Bank Atlas method, is gross national income (GNI) converted to U.S. dollars using the *World Bank Atlas* method divided by the midyear population. GNI is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. GNI, calculated in national currency, is usually converted to U.S. dollars at official exchange rates for comparisons across economies. The *World Bank Atlas* method is used to smooth fluctuations in prices and exchange rates. It averages the exchange rate for a given year and the two preceding years, adjusted for differences in rates of inflation between the country and the Euro area, Japan, the United Kingdom, and the United States. (World Bank)

Gross primary, secondary, and tertiary enrollment is the combined number of students enrolled in primary, secondary, and tertiary levels of education, regardless of age, as a percentage of the population of official school age for the three levels. (United Nations Educational, Scientific and Cultural Organization Institute for Statistics)

Households with a television are the percentage of households with a television (a standalone device capable of receiving broadcast television signals using such access means as over-the-air reception, cable, or satellite. (International Telecommunication Union)

ICT expenditure comprises computer hardware (computers, storage devices, printers, and other peripherals); computer software (operating systems,

programming tools, utilities, applications, and internal software development); computer services (information technology consulting, computer and network systems integration, web hosting, data processing services, and other services); and communications services (voice and data communications services) and wired and wireless communications equipment. (Global Insight and World Information Technology and Services Alliance)

ICT goods exports and imports are goods that are intended to fulfill the function of information processing and communication by electronic means, including transmission and display, or that use electronic processing to detect, measure, or record physical phenomena or to control a physical process. They include telecommunications equipment, computer and related equipment, electronic components, audio and video equipment, and other goods. Re-exports (exports of foreign goods in the same state as previously imported) are included. (United Nations Statistics Division)

ICT service exports comprise communications services (telecommunications, business network services, teleconferencing, support services, and postal services) and computer and information services (database, data processing, software design and development, maintenance and repair, and news agency services). (International Monetary Fund)

International Internet bandwidth is the capacity that backbone operators provide to carry Internet traffic. (International Telecommunication Union and TeleGeography)

International voice traffic is the sum of international incoming and outgoing telephone traffic (in minutes). (International Telecommunication Union and TeleGeography)

Internet users are people who pay for Internet access (dialup, leased line, and fixed broadband) and people with access to the worldwide computer network who do not directly pay (for example, people who are a member of a household with access and people who access the Internet from work or school). (International Telecommunication Union)

Level of competition, international long distance service, is the level of competition for international long distance telephone calls (M = monopoly, P = partial competition, C = full competition). (International Telecommunication Union and World Bank)

Level of competition, Internet service, is the level of competition for retail Internet access service (M = monopoly, P = partial competition, C = full competition). (International Telecommunication Union and World Bank)

Level of competition, mobile telephone service, is the level of competition for digital cellular mobile services (M = monopoly, P = partial competition, C = full competition). (International Telecommunication Union and World Bank)

Mobile and fixed-line subscribers per employee are telephone subscribers (fixed line plus mobile) divided by the total number of telecommunications employees. (International Telecommunication Union)

Mobile cellular subscriptions are the number of subscriptions—including postpaid and prepaid subscriptions—to a public mobile telephone service using cellular technology that provides access to the public switched telephone network. (International Telecommunication Union)

Glossary

Mobile cellular prepaid tariff is based on the Organisation for Economic Co-operation and Development's low-user definition, which includes the cost of monthly mobile use for 25 outgoing calls per month spread over the same network, other mobile networks, and mobile to fixed-line calls and during peak, off-peak, and weekend times as well as 30 text messages per month. (International Telecommunication Union)

Mobile telephone usage is the minutes of use per mobile user per month. (Wireless Intelligence)

Personal computers are self-contained computers designed to be used by a single individual. (International Telecommunication Union)

Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship, except for refugees not permanently settled in the country of asylum, who are generally considered part of the population of their country of origin. Data are midyear estimates. (World Bank)

Population covered by mobile cellular network is the percentage of people who live within areas served by a mobile cellular signal regardless of whether they use it. (International Telecommunication Union)

Residential fixed line tariff is the monthly subscription charge plus the cost of 30 three-minute local calls (15 peak and 15 off-peak). (International Telecommunication Union)

Secure Internet servers are the number of servers using encryption technology for Internet transactions. Data listed for 2008 are for December 2009. (Netcraft)

Separate telecommunications regulator indicates whether the country has a separate telecommunications regulator. (International Telecommunication Union)

Status of main fixed-line telephone operator indicates whether the incumbent fixed-line operator is a public or private entity. Public refers to a fully state-owned operator, private refers to a fully private operator, and mixed refers to a partially private operator. (International Telecommunication Union and World Bank)

Telecommunications revenue is revenue from the provision of telecommunications services such as fixed line, mobile, and data. (International Telecommunication Union)

Telecommunications investment is total telecommunications investment (capital expenditure) as a percentage of telecommunications revenue. (International Telecommunication Union)

Telephone lines are lines that connect a subscriber's terminal equipment to the public switched telephone network and that have a port on a telephone exchange. Integrated services digital network channels and fixed wireless subscribers are included. (International Telecommunication Union)

Urban population is the midyear population of areas defined as urban in each country and reported to the United Nations. (United Nations)
