Project Development Objectives

Project Development Objective (from Project Appraisal Document)

The Project development objective is to improve irrigation and drainage service delivery to support farmers in the Project areas. This will be achieved through rehabilitation and modernization of irrigation and drainage systems; improved management, operationandmaintenance of these systems; and more efficient use of associated irrigated lands; all with improved participation of users indeveloping and managing the rehabilitated / modernized systems.

Has the Project Development Objective been changed since Board Approval of the Project Objective?

Implementation Status and Key Decisions

The disbursement ratio of Loan proceeds has increased from 11% to 18% over the reporting period. The Project has also started registering considerable progress in implementation of Component 2 (Sustainable MOM of I&D Systems) and 3 (Agricultural Development) activities that have particularly resulted in the developed and operationalized secondary canals MOM plans and, in delivery of an extensive training and demonstration programs. However, the overall progress has been limited by lack of Project financing early in calendar year 2020 and hence it is critically important to confirm more funds for the Project within the ongoing State budget revision process as per the application of the Implementing Agency.

According to the Law of RK "on agricultural cooperatives" dated October, 2016, RCCs (WUAs) were reorganized and I&D Systems in sub-project areas were transferred to the republican property and are currently operated by state water organization (Kazvodkhoz). This indicator will be adjusted during the second project restructuring.

Comments:

The law on Rural Consumer Cooperatives of Water users (RCCs) was abolished early last CY2018, dismissing all RCCs in the country and alternatively empowering the regional branches of State Water Company (Kazvodkhoz) and larger farmer organizations (Agricultural Cooperatives) to provide on-farm level irrigation water supply services. This indicator will be adjusted during the second project restructuring.
