OVERVIEW OF KEY GENDER GAPS

Although slowly declining, adolescent fertility in Peru remains above the average for upper-middle income countries.

Young women in Peru are 7 percentage points more likely than young men to be out of employment, not in education, or in training.

Women are 13 percentage points more likely than women to have vulnerable jobs.

Only 53% of women have access to a financial account compared to 62% of men.

Peru is close to achieving gender parity in STEM graduates.

More than 1 in 10 women have experienced physical and/or sexual intimate partner violence in the last 12 months.
# GENDER EQUALITY IN PERU COMPARED TO ITS REGIONAL, STRUCTURAL AND ASPIRATIONAL PEERS

The indicators below align with the priority areas identified by the LAC Region Gender Action Plan (RGAP) FY21-FY25. The table shows comparable data for the most recent year (2015 to 2021)\(^1\) and trends for the available years starting from 2010.

---

**Peru**

- **Regional**: LAC average using the latest country data point between 2015-2021.
- **Structural**: Country’s income-level group average using the latest data point between 2015-2021.
- **Aspirational**: Average of the top-5 countries on the Global Gender Gap Index 2022 (Iceland, Finland, Norway, New Zealand, and Sweden) using the latest country data point between 2015-2021.

---

\(^1\) The Peru Gender Landscape Brief shows additional indicators in endowments, economic opportunity, and voice and agency. Women, Business, and the Law indicators; and other key measures.

\(^2\) The scorecard shows the latest country data and compares country performance with its regional and structural peers in the same or similar year. The country’s performance is scored relative to the comparison groups using a Traffic Light System: green if the country performs better than the two comparison groups; yellow if the country fares better than one comparison group; red if both peers perform better than the country. No traffic light means that no comparisons can be made due to incomplete data.

---

Data points refer to latest data point available. *Regarding completion of secondary school, a number higher than 100 reflects late entrants and overage students.

Sources: World Bank World Development Indicators (WDI) and World Bank Gender Statistics.

LAC average: includes the 42 countries (all income levels) in Latin America and the Caribbean, as classified by The World Bank Group.

For FY23, income groups are defined according to 2022 gross national income (GNI) per capita (in USD), calculated using the World Bank Atlas method:

- HIC: high-income group aggregate; economies with a GNI per capita higher than $13,205.
- UMC: upper-middle-income group aggregate; economies with a GNI per capita between $4,256 and $13,205.
- LMC: lower-middle-income group aggregate; economies with a GNI per capita between $1,086 and $4,255.
- LIC: low-income group aggregate; economies with a GNI per capita of $1,085 or less.

NA refers to cases when the number is not available for the country or peer groups, which impacts the assessment of country performance.
There are more gender gaps in LAC beyond the ones presented here. However, this scorecard focuses on the priority areas identified by the Regional Gender Action Plan FY21-FY25.

Below are 10 persistent gender gaps in LAC and corresponding evidence-based interventions that can help close them.

### Women in STEM Fields

Women are underrepresented in STEM graduate programs and careers

- Address gender biases in teaching and build a ‘science identity’ for girls.
- Expose young girls to female mentors and role models in STEM.
- Fund female students and researchers through scholarships, postdocs, and internships to retain women in STEM careers.

Find more solutions and examples of WB-supported operations [here](#).

### School-to-Work Transition

Young women are more likely than young men to be out of employment, not in education or training

- Promote women’s participation in non-traditional skills training programs by subsidizing attendance costs.
- Supplement in-classroom training with on-the-job internships.
- Strengthen labor intermediation with local and private entities for better training and targeting of vulnerable women.

Find more solutions and examples of WB-supported operations [here](#).

### Boys’ School Dropout

Fewer boys complete lower secondary school than girls

- Inform boys on wage returns to secondary education to raise interest to stay in school.
- Offer financial incentives like CCT or vouchers conditional to school attendance and academic progress.
- Train teachers on how to identify at-risk students and offer remedial learning to those falling behind.

Find more solutions and examples of WB-supported operations [here](#).

### Teenage Pregnancy

Girls from lower socio-economic status face higher risk of teenage pregnancy

- Offer peer-to-peer sexual and reproductive health education.
- Include goal-setting and critical thinking activities in life skills trainings.
- Avoid teen mothers’ school dropout through CCT programs.

Find more solutions and examples of WB-supported operations [here](#).
## Violence Against Women and Girls

On average, **1 in 3** women are subjected to violence

### Evidence-based solutions

- Supplement economic empowerment programs with activities like [community activism and school-based interventions](#) to prevent dating violence.
- Create and ensure safe spaces in schools and [public transport](#).
- Develop intersectoral response as well as [phone and internet helplines](#) to improve the prevention and detection of gender-based violence.

Find more solutions and examples of WB-supported operations [here](#).

## More and Better Jobs

In most LAC countries, the average woman has a **vulnerable job**

### Evidence-based solutions

- Offer [certification](#) in non-traditional sectors, combined with on-the-job training.
- Guarantee [parental leave](#) and equal pay for equal work between men and women.
- Adopt workplace strategies that promote the recruitment of women such as quotas in short lists and [gender-inclusive language](#) in job postings.

Find more solutions and examples of WB-supported operations [here](#).

## Women Entrepreneurs

Women tend to segregate in **less profitable sectors**

### Evidence-based solutions

- Combine business training with increased women’s access to [grants](#) and lending assistance.
- Match female entrepreneurs to [male role models](#) and mentors.
- Expand women’s credit access using [alternative forms](#) of collateral.

Find more solutions and examples of WB-supported operations [here](#).

## Ownership and Control of Productive Assets

Women are **less likely** to own and control assets than men

### Evidence-based solutions

- Formalize [joint titling](#) and registration of property rights for female heads of households.
- Simplify procedures for women’s access to [housing](#).
- Train land administration staff on [gender-equitable governance](#).

Find more solutions and examples of WB-supported operations [here](#).

---

4 In countries with low levels of financial inclusion, the inability to own productive assets (e.g., land or housing) worsens the problem of limited access to collateral and, thus, credit, especially for women ([Marysheva, 2022](#)).
Time spent on unpaid household work

Women spend significantly more time on unpaid domestic and care work than men

Evidence-based solutions

- Expand the supply of good-quality childcare services that meet families’ needs (location, times, ages served).
- Subsidize childcare services to increase mothers’ labor participation and earnings.
- Complement maternity or parental leave policies with parenting guidance for fathers offered via virtual workshops and SMS messages.

Find more solutions and examples of WB-supported operations here.

Gender data gaps

Gender data are limited: often incomplete, methodologically inaccurate, or completely lacking.

Evidence-based solutions

- Mainstream the adoption of international best practices in the production of gender data.
- Leverage existing engagements with National Statistical Offices regionally.

Country-specific data and analysis

- GBV: Rethinking the future of Peru: Policy Notes to transform the State into a welfare and development manager – WBG (2021)
- Peru Poverty Assessment (Forthcoming)
- Mainstream the adoption of international best practices in the production of gender data.
- Leverage existing engagements with National Statistical Offices regionally.

Legislative and regulatory framework

- Peru 2-pager of laws and regulations affecting women’s economic opportunities (2022)
- Peru: National Gender Equality Policy – Ministry of Women and Vulnerable Population

Gender strategic framework

- Peru Country Partnership Framework FY17-21 (2017)
- Peru Systematic Country Diagnostic (2022)
- Peru Gender Assessment (2018)
