\* Latest value shows the latest available country value for the indicator. Color coding of the latest country value represents a more than 10 percent change upward or downward from the country's baseline value from 10 years (+/- 2 years) prior to latest value. No coloring applied whenever there is no data for baseline or when latest available value is prior to 2020.

## Account ownership unlocks access to financial products

The gap in account ownership has narrowed since 2021 | Adults with an account (%)

Women in the labor force are more likely to have an account

**57%** of women who are in the labor force have a bank account, but only **44%** of women out of the labor force have a bank account

\* No country data available, therefore regional data is presented.

Fewer women than men are saving formally | Adults saving any money in the past year (%)

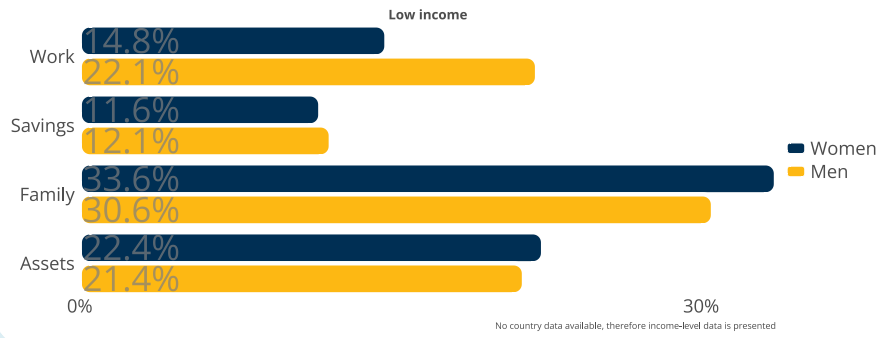

## Access to capital helps build businesses and create jobs

Fewer women than men are borrowing from formal financial institutions | Adults borrowing any money in the past year (%)

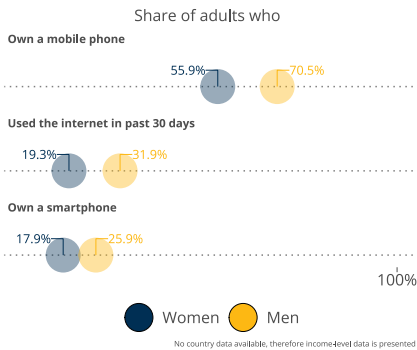

Men are more likely than women to be able to fall back on income from their job when facing unforeseen financial expenses | Adults identifying the source of emergency money (%)

## Digital connectivity can unlock and accelerate access to finance and jobs

Rates of mobile phone ownership and internet use are higher among men than women.

Mobile money can accelerate financial inclusion | Type of account for adults with an account (%)

Mobile technology increases access to job and learning opportunities | Share of adults who engaged in online activities (%)
