4. KEY ISSUES & STATUS

4.1 Implementation Status and Key Decisions

The Wildlife Conservation Bond (WCB) was issued on March 31, 2022. The project was declared effective on March 28, 2022. Five disbursements were made to date, equivalent to 61% of the total project funds. Key project staff are in place and have received training; ESF instruments were developed and disclosed at AENP and for GFRNR. Priority procurement packages were processed. Monitoring effectiveness continues to be a priority. T0-T2 estimation were completed, and verified for T0 and T2. Procurement and financial management ratings remain satisfactory. The Rhino Population Growth Rate (CAGR) as calculated by the calculation agent and verified by the verification agent at T2 is 7.65%.

	Comments on achieving targets		SanParks and EPTCA staff will undertake various actions to improve the management of target protected areas (PAs): including habitat management, range availability (AENP), rhino population management, containment and counter-poaching, monitoring, community engagement, and enabling conditions. Improvements to the management of PAs will be					

			assessed using the Management Effectiveness Tracking Tool (METT). The METT is commonly used to assess the management of PAs through assessing different dimensions of management including legal and regulatory framework, law enforcement capacity, planning, management plans, budget and resources, and staff capacity. The METT comprises 42 indicators, from which a maximum score of 99 is derived. This indicator measures the PAs in hectares, for which management has been improved. PA management is considered to be improved when there is an increase compared to a PA's baseline METT score. The total area of PAs whose management has been improved will be measured through this indicator.

	Comments on achieving targets		The baseline number of beneficiaries compromise of the staff currently employed on a permanent basis. Other beneficiaries currently include project staff on the following programs: Working for water, Working on Fire, Working on ecosystems and Environmental monitors (All funded by DFFE but implemented by SANParks). SANParks further employs temporary staff that works on an ad hoc basis. The Department of Tourism also fund 2 teams that fulfil maintenance functions. Through the project SANParks will appoint staff as per budget in the following categories: Rangers, Monitors, Gate guards, JOC staff and a project manager. Furthermore there will be employment opportunities during construction phase of new infrastructure as well as maintaining current infrastructure.

	Comments on achieving targets		SANParks currently do employ rangers in the different sections of the park. For the benefit of the program only the sections that have rhino currently (Darlington, Nyathi, Main camp and Colchester) and those that will receive rhino during the course of the project (Kabouga) will be used. This would be calculated by the size of the area (section) and the number of rangers employed per section. This would be done for the baseline as well as during the project phase. Area coverage could be determined through the CMORE progra
