WORLD BANK GROUP SCORECARD

VISION: Our vision is a world free of poverty on a livable planet

This document presents **THREE DIFFERENT VIEWS** of the WBG Scorecard:

WBG Scorecard

This view presents all data at the WBG level for a set of 50 indicators (8 Vision indicators, 22 Client Context indicators, and 20 WBG Results indicators). It provides an overview of the WBG's performance and progress towards its goals. The Scorecard is released at the Annual Meetings of the World Bank Group and the International Monetary Fund in October, 2024.

Disaggregation by Female, Youth and FCS

This view breaks down the WBG Results indicators by WBG institutions, focusing on gender, youth and FCS disaggregated results.*

Other disaggregation

This view provides a breakdown of data based on select criteria such as regions, income groups, Small States, SIDS, LDCs, and disability-inclusiveness. These disaggregation criteria allow for a more detailed analysis of the WBG's results.

WORLD BANK GROUP SCORECARD

VISION: Our vision is a world free of poverty on a livable planet

VISION INDICATORS

POVERTY

› Percentage of global population living in poverty (at \$2.15/day and \$6.85/day)

Latest value

9%, 46%

PROSPERITY

- › Global average income shortfall from a prosperity standard of \$25/day
- › Number of countries/economies with high inequality

5

49

PLANET

- › Global greenhouse gas emissions (Gigatons of CO₂ equivalent)
- › Percentage of people at high risk from climate-related hazards globally
- › Millions of hectares of key ecosystems globally
- › Percentage of people facing food and nutrition insecurity globally
- › Percentage of people with access to basic drinking water, sanitation services, or hygiene globally

54

18%

7,860

28%

91%, 81%, 72%

CLIENT CONTEXT INDICATORS

Latest data

WBG RESULTS INDICATORS

Stock		Cumulative
Achieved	Expected	Achieved
FY24		Jul'23-Jun'24

PEOPLE					
Protection for the poorest					
Percentage of people covered by social protection and labor programs in the total population and in the poorest quintile	58%, 65%	› Millions of beneficiaries of social safety net programs †	222	263	58
No learning poverty					
Percentage of children who cannot read by end-of-primary-school age	57%	› Millions of students supported with better education	305	352	33
Healthier lives					
Percentage of children under five stunted	24%	› Millions of people receiving quality health, nutrition, and population services	381	576	73
Universal health coverage service coverage index (0 – 100)	64	› Countries benefitting from strengthened capacity to prevent, detect, and respond to health emergencies	42	51	NA
PROSPERITY					
Effective macroeconomic and fiscal management					
Countries/economies at high risk of or in debt distress	59	› Countries in or at high risk of debt distress that implemented reforms towards debt sustainability (%) †	59%	59%	NA
Countries/economies with tax revenue-to-GDP ratios (including social security contributions) below or equal to 15%	57	› Countries with tax revenues-to-GDP ratios at or below 15% that have increased collections, considering equity †	17	32	NA
PLANET					
Green and blue planet and resilient populations					
Percentage of people exposed to hazardous air quality	59%	› Net GHG Emissions (Millions tonnes of CO ₂ e/year)	MTR	-306	NA
Countries/economies with increasing renewable natural capital per capita	24				
Percentage of terrestrial and aquatic areas that are protected	14%	› Millions of beneficiaries with enhanced resilience to climate risks	123	327	36
Proportion of fish stocks within biologically sustainable levels	62%	› Millions of hectares of terrestrial and aquatic areas under enhanced conservation/management	45	110	11
Inclusive and equitable water and sanitation services					
Percentage of people with access to basic drinking water, sanitation services, or hygiene	90%, 77%, 72%	› Millions of people provided with water, sanitation, and/or hygiene, of which (%) is safely managed	67 (4%)	156 (17%)	20 (1%)
Sustainable food systems					
Percentage of people facing food and nutrition insecurity	28%	› Millions of people with strengthened food and nutrition security	201	327	58
INFRASTRUCTURE					
Connected communities					
Percentage of people with access to reliable transport solutions all year-round	37% ¹	› Millions of people that benefit from improved access to sustainable transport infrastructure and services	142	427	25
Affordable, reliable, and sustainable energy for all					
Percentage of population with access to electricity	90%	› Millions of people provided with access to electricity	171	482	14
		› GW of renewable energy capacity enabled	20	117	3
DIGITAL					
Digital connectivity					
Percentage of population using the internet	63%	› Millions of people using broadband internet	114	415	12
Digital services					
State of online e-government service provision	0.5	› Millions of people using digitally enabled services	174	300	37
CROSS-CUTTING THEMES					
Gender equality (measured through gender-disaggregated outcomes across themes)					
Population that own a financial account, total (% population ages 15+) and female (% female population ages 15+)	69%, 66%	› Millions of people benefitting from actions to advance gender equality, of which (%) from actions that expand and enable economic opportunities	198 (48%)	372 (62%)	71 (49%)
		› Millions of people and businesses using financial services, of which (%) are women	73 (48%)	189 (50%)	0.78
More and better jobs					
Wage and salaried workers, total (% total employment) and female (% female employment)	45%, 45%	› Millions of new or better jobs, - of which (%) for women - of which (%) for youth	TBD	TBD	TBD
Youth not in education, employment, or training, total (% youth population) and female (% female youth population)	23%, 32%				
Better lives for people in fragility, conflict and violence (measured through FCS-disaggregated outcomes across themes)					
Percentage of population in FCS countries living in extreme poverty (at \$2.15/day)	31%	› Millions of displaced people and people in host communities provided with services and livelihoods	12	57	8
Millions of displaced people in need of protection	31				
More private investment					
Private investment as a percentage of GDP	29%	› \$ billions in total private capital enabled	TBD	TBD	TBD
		› \$ billions in total private capital mobilized	MTR	197	NA

TBD: To be disclosed. MTR: to be disclosed by mid-term review. N/A: not applicable. † IBRD and IDA only indicator. **Results achieved:** the stock of results that have occurred. **Expected results:** the anticipated results over the projects' results horizon. **Active portfolio:** results achieved and expected results are reported for the active portfolio as of end of June 2024. **Note:** Figures are rounded to nearest whole number (when applicable). **Cumulative achieved:** The starting point of the baseline is the stock of results achieved as of 01.07.2023 (start of the WBG Scorecard FY24-FY30 reporting cycle) and presents cumulative results that have occurred since. In this case it includes only the incremental results reported between 01.07.2023 and 30.06.2024 (FY24). **Note:** Cumulative is shown only for World Bank results. ¹ The data for the Transport indicator falls below the minimum data requirement on aggregation (50% of country or population coverage), covering only 17 client countries. However, is included for reference purposes.

WORLD BANK GROUP RESULTS INDICATORS

TBD: To be disclosed. MTR: to be disclosed by mid-term review. N/A: not applicable. † IBRD and IDA only indicator. ND: Not disclosed. In alignment with IFC and MIGA Access to Information Policies, project-level data is available in an aggregated format on the WBG Scorecard, provided the minimum threshold to secure individual clients' data is satisfied. Results achieved: the stock of results that have occurred. Expected results: the anticipated results over the projects' results horizon. Results achieved and expected are reported for the active portfolio as of June 2024. Figures are rounded to the nearest whole number when applicable. Values less than 1 but greater than or equal to 0.005 are shown with two decimal points (e.g., 0.98, 0.03). Values less than 0.005 but greater than 0 are represented as 0.

TBD: To be disclosed. MTR: to be disclosed by mid-term review. N/A: not applicable. † IBRD and IDA only indicator. ND: Not disclosed. In alignment with IFC and MIGA Access to Information Policies, project-level data is available in an aggregated format on the WBG Scorecard, provided the minimum threshold to secure individual clients' data is satisfied. Results achieved: the stock of results that have occurred. Expected results: the anticipated results over the projects' results horizon. Results achieved and expected are reported for the active portfolio as of June 2024. Figures are rounded to the nearest whole number when applicable. Values less than 1 but greater than or equal to 0.005 are shown with two decimal points (e.g., 0.98, 0.03). Values less than 0.005 but greater than 0 are represented as >0.

Note 1: The World Bank allocates results from Blend financing projects to IDA and IBRD proportionally based on their contribution to the project's total net financial commitment. IFC and MIGA results are not allocated into IDA and IBRD institution disaggregation level. Note 2: For stock of active operations IBRD, IDA, IFC and MIGA used harmonized definitions, anchored in the respective results architectures of the World Bank, IFC, and MIGA. Note 3: The values shown in this edition will become more comprehensive over time as the WBG integrates new enhanced methods for measuring results across its portfolio. Note 4: The data values presented for client context indicators are for World Bank Group client countries. If the data value for World Bank Group client countries is not available, the world aggregate data value is reported instead. Note 5: Scorecard results for situations affected by fragility, conflict, and/or violence are based on countries listed annually on the WBG's *list of Fragile and Conflict-affected Situations (FCS)*, which is a subset of the broader group of countries affected by FCV. Note 6: For the purposes of Scorecard data disaggregation, 'youth' is defined according to the UN standard, which includes individuals aged 15 to 24.

TBD: To be disclosed. MTR: to be disclosed by mid-term review. N/A: not applicable. † IBRD and IDA only indicator. ND: Not disclosed. In alignment with IFC and MIGA Access to Information Policies, project-level data is available in an aggregated format on the WBG Scorecard, provided the minimum threshold to secure individual clients' data is satisfied. Results achieved: the stock of results that have occurred. Expected results: the anticipated results over the projects' results horizon. Results achieved and expected are reported for the active portfolio as of June 2024. Figures are rounded to the nearest whole number when applicable. Values less than 1 but greater than or equal to 0.005 are shown with two decimal points (e.g., 0.98, 0.03). Values less than 0.005 but greater than 0 are represented as >0.

Please note the following caveats regarding new methodologies, indicators, and reporting practices, which may affect the interpretation and comparability of the data provided:

1. **Partial portfolio results reporting due to ongoing retrofitting of new WBG Results indicators** – The results reporting for the Annual Meetings release is only from a share of the portfolio as retrofitting of new indicators in the active portfolio is in progress. As more projects incorporate the new WBG Results indicators, the figures are expected to capture a broader spectrum of the WBG’s support to clients.
2. **Ongoing harmonization and adoption of methodologies** – The harmonization and adoption of new methodologies in previously adopted projects or investment level metrics across the active portfolio of the World Bank (WB), the International Finance Corporation (IFC) and the Multilateral Investment Guarantee Agency (MIGA) is currently in progress. Over time, the methodologies will be adopted as clients implement the corresponding data collection mechanisms and start reporting under the new methodologies. For example, the low share of people provided with safely managed water and sanitation is due to the ongoing mainstreaming of the "safely managed" dimension into projects’ results frameworks or low share of countries shown on the health emergencies indicator is due to a conservative evaluation of Health Emergency, Preparedness, Prevention, and Response interventions that excluded COVID-19 projects from calculations presented.
3. **Variations in the definition of active portfolio among WB, IFC, and MIGA** – For the WB, active portfolio includes projects active by the reporting fiscal year (FY), along with projects closed that have not submitted yet an Implementation Completion and Results Report. For IFC, expected results include committed investments reporting estimated future results. Achieved results are sourced from projects that have reached Early Operating Maturity and have yet to complete their Anticipated Impact Measurement and Monitoring (AIMM) target year. For MIGA, it includes projects that have active guarantee contracts as of the reporting fiscal year, but which have not yet reached the assessment for development results.
4. **Pending finalization of methodological notes for WBG Results indicators** – Methodological notes for the WBG Results indicators are living documents and subject to being updated over time based on experience and lessons learned. Updates of the methodological notes will be non-substantial to deter breaks in time series reported during the WBG Scorecard cycle FY24-FY30.
5. **New results reporting framework** – The WBG has adopted a new results reporting framework as approved by the Board on December 19th, 2023. This involves reporting on stock of *results achieved* and stock of *expected results* as described previously. Due to this methodological shift, the figures reported in the new WBG Scorecard cycle FY24-FY30 cannot be compared with previous cycles (measuring flow). However, backend data on results indicators will be released allowing stakeholders to derive previously used approaches as needed.
6. **Disaggregated figures may not equal the total** – When figures are disaggregated by region or income level, they may not aggregate to the overall total because some operations span countries from multiple regions or income groups, and the results cannot be proportionately allocated. Furthermore, Regional projects were not categorized into income groups due to the involvement of multiple countries in each regional project, and because countries within the project may have varying income classifications.
7. **Exclusion in cumulative progress calculations.** Cumulative Achieved includes only the incremental of results reported between 01.07.2023 and 30.06.2024 and is calculated only for beneficiaries’ indicators. Beneficiaries of indirect, improved, or enhanced access—such as those that are part of the methodologies for the transport, electricity, and internet indicators—are not included in cumulative calculations. If the indicator was missing or unavailable prior to 01.07.2023, the progress has been assumed to be zero before 01.07.2023.
8. **Concentration of indicator influence in a few countries** – For many indicators, a high share of results reported are primarily influenced by a few countries with high population density (for example, India, Brazil, Nigeria, Bangladesh, Ethiopia, or Pakistan). However, the unprecedented levels of disaggregation and release of backend files of the WBG Results indicators allows users to overcome potential demographic bias by creating their own tailor-made analysis.
9. **Female and youth breakdown** – In instances where results data with percentage of female/youth was unavailable, the country-specific female/youth population share were used as a proxy for the overall share, assuming that the project is benefiting that proportion of the female/youth population. Depending on project specificities, however, percentage of female/youth reached could be different. Metrics on percentage of beneficiaries who are female/youth based on actuals will be expanded over time, reducing use of proxies for deriving female/youth beneficiaries. In this cycle of reporting, on average, for WB the female breakdown on actuals is available for 45% of projects reporting on results, while for youth breakdown is for 9% of projects reporting on results.
10. **Double counting** – From this new WBG Scorecard cycle FY24-FY30, for the first time new principles to limit potential double counting (within projects and between projects) involving assessment of the geospatial and temporal distribution of projects have been implemented. However, the adoption of these new principles is ongoing and is expected to expand across institutions, and results figures reported will be updated over time as more spatial data becomes available.
11. **Delays in end target adjustments** – For some indicators, aggregated *results achieved* align closely with *expected results*. This can be attributed to some projects exceeding initial targets; where the targets have not yet been revised to reflect exceptional performance. New measures to improve robustness of outcome data calculations were introduced in this reporting cycle. For example, projects overshooting targets were removed from the cohort reported if they were biasing the overall figure, thus resulting in a decline in the reported figures for a few indicators compared to the transitional calculations released in June. This conservative approach was taken to avoid misinterpretation of the overall WBG Scorecard data. Furthermore, it is important to note that while both methods (stock of *results achieved* and stock of *expected results*) measure the same stock of interventions, they consider different time horizons and provide complementary information to assess the full scale of WBG results delivery.

WORLD BANK GROUP SCORECARD

Definitions of indicators

I. VISION INDICATORS (Page 1 of 1)		
Indicator name	Definition	Unit
Percentage of global population living in poverty (at \$2.15/day and \$6.85/day)	The percentage of people living on less than \$2.15 and \$6.85 a day in 2017 purchasing power adjusted prices. Measures based on international poverty lines hold the real value of the poverty line constant across countries when making national and temporal comparisons. The current extreme poverty line (\$2.15 a day, 2017 PPP) represents the median of the poverty lines found in 28 of the poorest countries ranked by per capita consumption. The threshold at \$6.85 corresponds to the median poverty line for upper-middle income countries. Statistics reported are based on consumption data or, when unavailable, on income surveys. <i>Source: World Bank Poverty and Inequality Platform</i>	Percentage
Global average income shortfall from a prosperity standard of \$25/day	The average income shortfall from a prosperity standard of \$25 per day (adjusted for differences in purchasing power parity across countries). It is measured as the average factor by which incomes need to increase to reach the prosperity standard. As a distribution-sensitive measure, the gap narrows when incomes increase anywhere in the world and falls fastest when incomes of the very poorest increase: growth in income of a person earning \$2.50 per day gets ten times more weight than growth in income of a person earning \$25/day. Improvements (i.e., reductions) in the Prosperity Gap reflect increases in average income and reductions in inequality between and within countries. <i>Source: World Bank Poverty and Inequality Platform</i>	Income shortfall (2017 \$PPP)
Number of countries/economies with high inequality	The number of countries/economies facing high inequality, where high inequality is defined as those with a Gini index greater than 40. This is based on the most recent household survey. The indicator is reported for all countries/economies with a harmonized consumption or income aggregates in the World Bank's Poverty and Inequality Platform (PIP). <i>Source: World Bank Poverty and Inequality Platform</i>	Number of countries /economies
Global greenhouse gas emissions (Gigatons of CO₂ equivalent)	A measure of annual emissions of greenhouse gasses (GHG) disaggregated at the global level by four gas categories—carbon dioxide (CO ₂), methane (CH ₄), nitrous oxide (N ₂ O), and F-gasses—and 13 subsectors within the energy, industry, waste, agriculture, and land use, land use change, and forestry sectors, standardized to carbon dioxide equivalent values. At the country level, data are further disaggregated by the six greenhouse gases covered by the Kyoto Protocol—CO ₂ , CH ₄ , N ₂ O, hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and Sulphur hexafluoride (SF ₆)—plus hydrochlorofluorocarbons (HCFCs) and nitrogen trifluoride (NF ₃) and 15 subsectors that further disaggregate the agriculture and the waste sector. <i>Source: Emissions Database for Global Atmospheric Emissions (EDGAR)</i>	GtCO ₂ eq
Percentage of people at high risk from climate-related hazards globally	The percentage of people globally who are both exposed to a set of key climate-related hazards (floods, droughts, cyclones, and heatwaves) and are also highly vulnerable (i.e., have a propensity to be adversely affected or unable to cope with the impacts), as a share of global population. Specifically, people are counted as at high risk from climate-related hazards if they are exposed to at least one hazard and are identified as highly vulnerable on at least one dimension of vulnerability. <i>Source: Global Human Settlement Layer (GHSL) produced by the Joint Research Centre, European Union, FAO ASI, Fathom Global 2.0, flood hazard dataset, World Bank Climate Change Knowledge Portal, World Development Indicators, World Bank PIP, World Bank Rural Access Index.</i>	Percentage
Millions of hectares of key ecosystems globally	The area of selected key ecosystems on the planet including forests, grasslands, shrublands, mangroves, and corals that provide an indication of the health of the planet. <i>Source: European Space Agency WorldCover, Global Mangrove Watch, Allan Coral Atlas Reef Habitat v2.0.</i>	Millions (Hectares)
Percentage of people facing food and nutrition insecurity globally	The percentage of people worldwide who live in moderately or severely food insecure households with at least one adult exposed to low-quality diets or forced to reduce the quantity of normal consumption during a year due to a lack of money or other resources. <i>Source: Food and Agriculture Organization of the United Nations (FAO).</i>	Percentage
Percentage of people with access to basic drinking water, sanitation services, or hygiene globally	The percentage of people with access to water, sanitation, and hygiene, as tracked in three separate sub-indicators. Basic water refers to water from an improved source within collection time of 30 minutes for a roundtrip including queuing. Basic sanitation refers to the use of improved facilities which are not shared with other households. Basic hygiene refers to the availability of a handwashing facility with soap and water at home. <i>Source: UNICEF-WHO Joint Monitoring Program (JMP).</i>	Percentage

WORLD BANK GROUP SCORECARD

Definitions of indicators

II. CLIENT CONTEXT INDICATORS (Page 1 of 2)

Indicator name	Definition	Unit
Protection for the poorest		
Percentage of people covered by social protection and labor programs in the total population and in the poorest quintile	The percentage of the population that is participating in social protection and labor programs, including Social Assistance, Social Insurance, and Labor Market policies, of which those in the bottom 20% of income/consumption (ASPIRE classification). This will be measured at the country level based on quintiles calculated country-by-country. <i>Source: Atlas of Social Protection Indicators of Resilience and Equity (ASPIRE)</i>	Percentage
No learning poverty		
Percentage of children who cannot read by end-of-primary-school age	The percentage of end-of-primary-school-age children who are not able to read and understand a short story of age-appropriate material. <i>Source: Learning Poverty Report, joint publication of the World Bank, UNICEF, FCDO, USAID, The Bill & Melinda Gates Foundation and in partnership with UNESCO</i>	Percentage
Healthier lives		
Percentage of children under five stunted	The percentage of children under age five whose height for age is more than two standard deviations below the median for the international reference population ages 0–59 months. <i>Source: UNICEF-WHO-WB Joint Child Malnutrition Estimates</i>	Percentage
Universal health coverage service coverage index (0 – 100)	Coverage of essential health services including reproductive, maternal, newborn, and child health, infectious diseases, and non-communicable diseases and service capacity and access. <i>Source: WB-WHO UHC service coverage index</i>	Index: 0-100
Effective macroeconomic and fiscal management		
Countries /economies at high risk of or in debt distress	The number of countries/economies that are either at high risk of or directly in debt distress using LIC DSA rating or the sovereign credit rating by a major credit rating agency (S&P, Moody's, or Fitch). <i>Source: LIC DSA database and Bloomberg</i>	Number of countries /economies
Countries /economies with tax revenue-to-GDP ratios (including social security contributions) below or equal to 15%	The number of countries/economies with unweighted average change in tax revenue to GDP ratio below or equal to 15% for three consecutive years. <i>Source: IMF WEO database, Government Finance Statistics, National Statistics Offices</i>	Number of countries /economies
Green and blue planet and resilient populations		
Percentage of people exposed to hazardous air quality	The percentage of population living in areas with hazardous ambient air quality. "Hazardous" air quality is defined as annual average concentrations of PM _{2.5} (Particulate Matter less than 2.5 micrometers in diameter that are responsible for significant health impacts) that exceed 35 µg/m ³ . <i>Source: Aerosol Optical Depth retrievals from NASA MODIS, MISR, SeaWiFS, and VIIRS instruments, chemical transport modelling (GEOS-Chem), and ground monitor-based calibration (with a Geographically Weighted Regression)</i>	Percentage
Countries/economies with increasing renewable natural capital per capita	The number of countries/economies with positive changes in renewable natural capital per capita, based on a subset of assets in the renewable natural capital data series currently produced as part of the Changing Wealth of Nations publication and published on the World Development Indicators data-base. <i>Source: Changing Wealth of Nations Dataset</i>	Number of countries /economies
Percentage of terrestrial and aquatic areas that are protected	The percentage of area of geographical space, recognized, dedicated, and managed, through legal or other effective means, to achieve the long-term conservation of nature with associated ecosystem services and cultural values. <i>Source: UNEP-WCMC, IUCN, and Bird Life International (methodology to be finalized by the Convention for Biological Diversity)</i>	Percentage
Proportion of fish stocks within biologically sustainable levels	The percentage of fish stocks classified as "within biologically sustainable levels" as part of the total number of stocks within the maximum sustainable yield for fishing. <i>Source: Food and Agriculture Organization of the United Nations (FAO)</i>	Percentage
Inclusive and equitable water and sanitation services		
Percentage of people with access to basic drinking water, sanitation services, or hygiene	The percentage of people with access to water, sanitation, and hygiene, as tracked in three separate sub-indicators. Basic water refers to water from an improved source within collection time of 30 minutes for a roundtrip including queuing. Basic sanitation refers to the use of improved facilities which are not shared with other households. Basic hygiene refers to the availability of a handwashing facility with soap and water at home. <i>Source: UNICEF-WHO Joint Monitoring Program (JMP).</i>	Percentage

WORLD BANK GROUP SCORECARD

Definitions of indicators

II. CLIENT CONTEXT INDICATORS (Page 2 of 2)

Indicator name	Definition	Unit
Sustainable food systems		
Percentage of people facing food and nutrition insecurity	The percentage of people worldwide who live in moderately or severely food insecure households with at least one adult exposed to low-quality diets or forced to reduce the quantity of normal consumption during a year due to a lack of money or other resources. <i>Source: Food and Agriculture Organization of the United Nations (FAO).</i>	Percentage
Connected communities		
Percentage of people with access to reliable transport solutions all year-round	The percentage of the population that has safe and dependable transportation options throughout the year. In urban areas this measures the estimated share of urban population who can access a public transport stop within a walking distance of 500 meters (low-capacity public transport) and/or 1,000 meters (high-capacity public transport) along the street network. In rural areas this measures the proportion of the rural population living within 2 km of an all-season road. <i>Source: World Bank Rural Access Index, UN Population Division, WorldPop, Global Urban Rural Mapping Project (GRUMP) v1 Urban Extent Polygons, OpenStreetMap, Global Road Inventory Dataset (GRIP)</i>	Percentage
Affordable, reliable, and sustainable energy for all		
Percentage of population with access to electricity	The percentage of population with access to electricity with electrification data collected from industry, national surveys, and international sources. <i>Source: Energy Sector Management Assistance Program (ESMAP), World Development Indicators</i>	Percentage
Digital connectivity		
Percentage of population using the internet	The percentage of people who have used the Internet in the last 3 months. <i>Source: International Telecommunications Union (ITU)</i>	Percentage
Digital services		
State of online e-government service provision	The scope and quality of online services available according to the Online Service Index (OSI) from the United Nation's' E-Government Development Index (EGDI). <i>Source: United Nation's' e-government development index (EGDI)</i>	Index: 0 -1
Gender equality		
Population that own a financial account, total (% population ages 15+) and female (% female population ages 15+)	The percentage of adults who report having an account at a bank or other regulated financial institution such as a credit union, microfinance institution, or post office; having a debit card in their own name; receiving wages, government transfers, or payments for agricultural products into an account or through a mobile phone at a financial institution in the past 12 months; paying utility bills or school fees from an account at a financial institution in the past 12 months; receiving wages or government transfers into a card in the past 12 months. <i>Source: World Bank Global Findex database, Gallup World Poll</i>	Percentage
More and better jobs		
Wage and salaried workers, total (% total employment) and female (% female employment)	The percentage of the total employed who are wage and salaried workers. The total employed comprises two categories by status in employment: (a) wage and salaried workers (also known as employees); and (b) self-employed workers. Wage and salaried workers are those workers who hold the type of jobs defined as paid employment jobs remunerated according to an employment contract. <i>Source: ILOSTAT</i>	Percentage
Youth not in education, employment, or training, total (% youth population) and female (% female youth population)	The percentage of youth who are not in education, employment, or training (NEET) relative to the total population of the corresponding age group. <i>Source: World Development Indicators, ILOSTAT</i>	Percentage
Better lives for people in fragility, conflict and violence		
Percentage of population in FCS countries living in extreme poverty (at \$2.15/day)	The percentage of people living under extreme poverty (\$2.15 per day based on 2017 PPPs) that live in fragile and conflict-affected situations. <i>Source: World Bank Poverty and Inequality Platform</i>	Percentage
Millions of displaced people in need of protection	Number of internally displaced population (IDPs), refugees, and asylum-seekers forced to flee their homes in a given year. <i>Source: The Global Trend Report, UNHCR, the UN Refugee Agency</i>	Millions of people
More private investment		
Private investment as a percentage of GDP	The gross outlays by the private sector (including private nonprofit agencies in addition to its fixed domestic assets) as percentage of GDP. <i>Source: World Bank's Macro-Fiscal Model (MFMOD) database and OECD National Accounts data files</i>	Percentage

WORLD BANK GROUP SCORECARD

Definitions of indicators

III. WBG RESULTS INDICATORS (Page 1 of 5)

Indicator name	Definition	Unit
Protection for the poorest		
Beneficiaries of social safety net programs†	The number of individuals benefiting from safety net programs supported by World Bank operations. Social safety nets are non-contributory programs that are pro-poor and aim to reach the poorest and most vulnerable populations. These measures include cash-based interventions, public works and workfare programs, fee waivers for services, and in-kind assistance to address critical needs (such as food, medicine, shelter, and social services). <i>Source: WB Operations Portal; ISR/ICR database.</i>	Beneficiaries (millions)
No learning poverty		
Students supported with better education	The number of students benefiting from activities supported by IBRD, IDA, IFC, and MIGA that change education in ways that increase participation, improve learning, or improve labor market outcomes. To increase learning for all, more children, youth, and adults must be enrolled in education institutions for longer and attending frequently, and the quality of the education services they receive must be more effective at improving learning and building skills (cognitive, non-cognitive, and job-specific), ultimately leading to better labor market outcomes. It includes beneficiaries of any age in formal or non-formal settings, in the public or private sectors, at any level namely early childhood, primary, secondary (general and vocational), and post-secondary (including technical, vocational, and tertiary). The indicator builds on and enhances existing methodologies. <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i>	Beneficiaries (millions)
Healthier lives		
People receiving quality health, nutrition, and population services	The number of people benefiting directly from the utilization and quality improvements of health prevention, promotion, diagnostic, curative, rehabilitative, and palliative care due to IBRD, IDA, IFC, and MIGA activities during the intervention period. WBG support includes a mix of inputs, skills, and processes that are directly used to deliver care to beneficiaries by health care workers in a facility, through outreach, campaigns, or via telemedicine visits. The interventions must promote quality services, given that quality care is essential for improving the health of the population. Interventions may also include more indirect interventions, such as health system strengthening initiatives, including training of health care workers, infrastructure development, or upgrades to health facilities, supply chain interventions in the public and private sectors, and the production of pharmaceuticals and health care products. Any of these interventions (direct and indirect) may be included if they are directly supported by WBG financing, and if the impact can be demonstrated through 1) availability of actual utilization data at sites where the WBG receives support; OR 2) a robust modelling approach, (which is adopted through a rigorous peer-reviewed process) to estimate the expected link between the intervention and number of people using services. A list of examples that would be included/excluded is included in the methods and will be updated regularly. <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i>	Beneficiaries (millions)
Countries benefitting from strengthened capacity to prevent, detect and respond to health emergencies	The number of countries benefitting from IBRD, IDA, IFC and MIGA support to strengthen health emergency prevention, preparedness and response (HEPPR) capacities and performance during the intervention period. These interventions must be aligned with the International Health Regulations and/or other internationally recognized frameworks and recommendations and/or must be part of a recommended set of WBG interventions that can be carried out through WBG support to increase resilience of health systems and availability of emergency-ready health services, for example, through pre-arranged agreements, platforms, and contracts for service delivery or governance arrangements during a health emergency. The indicator also includes interventions to strengthen equitable access to medical countermeasures (MCMs); interventions to enable rapid disbursement of surge financing (including contingency financing and financing for medical countermeasures); and social protection interventions that protect individuals during a crisis. Examples of eligible activities are defined in this note, but criteria will be updated periodically. A health emergency is defined as any event that may have negative consequences for human health, impacts the lives and well-being of a large number of people or a significant percentage of a population, and requires substantial multisectoral assistance (World Health Organization, WHO, 2005). This definition covers events occurring irrespective of their origin or sources, including natural disasters, climate-related disasters, war, conflict, and epidemics or pandemics (WHO, 2017). <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i>	Number of countries
Effective macroeconomic and fiscal management		
Countries in or at high risk of debt distress that implemented reforms towards debt sustainability (%)†	The <i>realized</i> result indicator is ratio of the number of countries in, or at high risk of, debt distress in year T that have implemented reforms toward debt sustainability in the same and previous year (i.e., T and T-1) to the total number of countries in or at high risk of debt distress in year T, expressed as a percentage. The <i>expected</i> result indicator is the ratio of the number of countries in, or at high risk of debt distress in year T that are expected to implement reforms in year T and T+1, to the total number of countries in high risk of debt distress or in debt distress in year T, expressed as a percentage. Countries in debt distress or at high risk of debt distress are defined as in the World Bank Group Client Context Indicators. “Reforms towards debt sustainability” include policy actions related to a) fiscal sustainability; b) debt management; and c) debt transparency and reporting. <i>Source: WB Operations Portal; ISR/ICR database, Debt Management Monitors, PPAs implementation reports, DSA database</i>	Percentage of countries

† IBRD and IDA only indicator.

III. WBG RESULTS INDICATORS (Page 2 of 5)

Indicator name	Definition	Unit
Effective macroeconomic and fiscal management		
Countries with tax revenues-to-GDP ratio at or below 15% that have increased collections, considering equity†	The indicator will assess the extent to which countries with tax-to-GDP ratios equal to or below the 15 percent threshold are able to improve their revenue collection in real terms, considering equity. The indicator encompasses client countries whose tax revenues equaled or were less than 15% of GDP during the baseline year. Countries will be included in the indicator if they demonstrate an improvement in tax revenues in real terms compared to the previous year, with support from World Bank operations and analytical work, taking into consideration the equity aspects of tax and broader fiscal reforms. Reforms will be identified in the Prior Actions of DPOs, project components of PforRs and IPFs operations, core diagnostics (such as Public Finance Reviews), and technical assistance projects where the implications of these reforms for equity are assessed. DRM results data cover the calendar year (CY) instead of the fiscal year (FY). <i>Source: WB Operations Portal; ISR/ICR database, fiscal portfolio</i>	Number of countries
Green and blue planet and resilient populations		
Net GHG Emissions	Annualized estimations of net greenhouse gas (GHG) emissions are typically calculated as the difference between project emissions (aggregated over the economic lifetime of the project), and the emissions of a baseline scenario (aggregated over the same time horizon) for eligible IBRD, IDA, IFC, and MIGA projects. Emissions values are estimated ex-ante (i.e., during project preparation) at the project-level using approved GHG accounting methodologies. The indicator value is negative if the project is reducing emissions compared with the baseline scenario, and positive if the project is increasing emissions compared with the baseline scenario. Net GHG emissions per fiscal year (FY) are the sum of net emissions of projects approved (IBRD/IDA)/signed (MIGA)/committed (IFC) in the reported fiscal year. WBG institutions follow the IFI Guideline for a Harmonized Approach to Greenhouse Gas Accounting, which defines various terminologies relevant to GHG Accounting, including but not limited to Scope 1, Scope 2, Scope 3 emissions. <i>Source: WB Operations Portal; Project Appraisal Documents; IFC Results Measurement System; MIGA Results Measurement System.</i>	MtCO ₂ eq /year
Beneficiaries with enhanced resilience to climate risks	This indicator is defined as the number of people directly benefiting from improved climate risk management and increased climate resilience due to eligible investments, including through financial intermediaries, and activities by the World Bank, IFC, and MIGA during the intervention period, where data and methodologies exist. This considers how interventions enhance resilience of their beneficiaries by including structural investments, non-structural or capacity development elements, and improvements to the enabling environments and institutional frameworks for climate resilience. These interventions could include, for example: access to climate resilient infrastructure, climate-smart agriculture, food, and water, early warning systems, enhanced climate disaster response, and support to livelihoods, education, financial mechanisms, and social safety nets. People captured as beneficiaries with increased climate resilience may be all or a sub-set of targeted project or component beneficiaries, and/or could be a broader population depending on the activity type and reach. <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i>	Beneficiaries (millions)
Hectares of terrestrial and aquatic areas under enhanced conservation /management	The indicator measures the terrestrial and inland/marine aquatic areas (in millions of hectares) that are under enhanced protection, conservation, restoration, and/or sustainable management through operations supported by IBRD, IDA, IFC, and MIGA. This will include the results of work on diverse Landscapes (e.g., forests, grass/shrub lands, woodlands, wetlands, water bodies, watersheds, oases, and urban green and blue spaces) and Seascapes (e.g., ocean and coastal zones, including wetlands, deltas, mangroves, and reefs) that have been improved from a nature perspective. These are expected to improve the extent or condition of these areas relating to biodiversity or other ecosystem services and address drivers of nature loss. Relevant activities may reduce and reverse natural resource degradation, protect and enhance natural habitats and their ecosystem services, and thus provide nature benefits to dependent communities. This indicator does not include terrestrial or aquatic areas managed as offsets for project-related biodiversity impacts (public or private sector). Production landscapes or seascapes (e.g., plantations, agriculture, and aquaculture areas) may be included where practices are applied that result in demonstratable benefits to nature, while not involving conversation of natural habitats. <i>Source: WB Operations Portal; ISR/ICR database. IFC Results Measurement System; MIGA Results Measurement System.</i>	Hectares (millions)

† IBRD and IDA only indicator.

III. WBG RESULTS INDICATORS (Page 3 of 5)

Indicator name	Definition	Unit
Inclusive and equitable water and sanitation services		
People provided with water, sanitation, and/or hygiene, of which (%) is safely managed	The number of people who benefited from water, sanitation, and/or hygiene services enabled by IBRD, IDA, IFC, and MIGA interventions, as well as people benefiting from improvements in their water, sanitation and/or hygiene facilities and services through rehabilitation works (people that already had access to WASH services but at lower levels of the drinking, sanitation, and handwashing ladders), with the corresponding breakdown for safely managed. Improvements in service (water source, water quality, continuity, reduction in NRW, etc.) will capture beneficiaries that: (i) remain within their level of service provision but experience improvement in service dimensions such as hours of supply, quality of water, continuity or other quantifiable service metric, or (ii) move from lower-level service to basic or above or move from basic to safely managed. The indicator will also capture results from projects delivering services in contexts where only limited service is possible (e.g., public markets, refugee camps, etc.). Definitions of limited, at least basic and safely managed water, sanitation and hygiene are those established by the UNICEF-WHO Joint Monitoring Program (JMP). <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i>	Beneficiaries (millions)
Sustainable food systems		
People with strengthened food and nutrition security	The number of people benefiting from interventions by IBRD, IDA, IFC, and MIGA across multiple sectors that strengthen food and nutrition security. These interventions may span the universally accepted dimensions of food and nutrition security, including the availability of food, access to food, utilization of food and stability of food systems. Examples of such interventions could include operations from a diverse set of thematic areas, such as climate resilient agriculture and food systems, social protection/social safety nets, nutrition services, supply chains, financial and trade finance operations that support food inputs, imports, and distribution of food, improved irrigation and drainage services, agricultural services, improved practices and technologies to enhance agricultural production and integration of farmers to markets. <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i>	Beneficiaries (millions)
Connected communities		
People that benefit from improved access to sustainable transport infrastructure and services	Beneficiaries of improved transport conditions in urban and rural contexts enabled by IBRD, IDA, IFC, and MIGA operations. It assesses the number of people that experience improved access to sustainable transport infrastructure or services that have been built or rehabilitated through financed or guaranteed interventions (e.g., climate-resilient highways, rural roads, urban and interurban roads, non-motorized transport facilities, public transport, railways, ports, and airports). It will build on SDG 11.2 to systematically measure improvements in sustainable transport in countries that are financed or guaranteed through IBRD, IDA, IFC, and MIGA interventions. <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i>	Beneficiaries (millions)
Affordable, reliable, and sustainable energy for all		
People provided with access to electricity	The number of people who have received new or improved electricity service through operations supported by IBRD, IDA, IFC, and MIGA. This includes estimates of direct access, inferred access, and improved service, covering affordability, reliability, availability, and other attributes as defined under the Multi-Tier Framework for Energy Access. ¹¹ Affordability is considered as the cost of a standard consumption package per year relative to household income and is aligned with SDG7. <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i>	Beneficiaries (millions)
Renewable energy capacity enabled	The number of gigawatts (GW) of the generation capacity of renewable energy enabled with direct support, indirect support, and/or enabling policy support through operations supported by IBRD, IDA, IFC, and MIGA. This includes direct investments in physical infrastructure (both greenfield and brownfield), enabling infrastructure (transmission and distribution, grid integration, and energy storage), support to private sector investment in renewable energy markets (project and corporate financing, guarantees, and transaction advisory), and the development of government policies, laws, or regulations that are expected to accelerate the expansion of renewable energy capacity. <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i>	GW
Digital connectivity		
People using broadband internet	The number of people, public sector facilities, businesses who use new or enhanced internet broadband facilitated by WBG interventions. It includes people who were previously unconnected and are new users of broadband internet (new use and inferred use) and people who have benefitted from improved broadband internet service during the project implementation period. Use is measured as the number of subscribers to broadband internet. Subscribers who pay for internet services are typically frequent users and data on mobile subscribers tracks active users (GSMA). New or enhanced use at a business or public facility, or via a public access point, will be converted into an estimated number of people beneficiaries for the purpose of aggregation and mentions of people below will include people benefitting through businesses or public sector facilities. The indicator builds on and enhances existing methodologies. <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i>	Beneficiaries (millions)

III. WBG RESULTS INDICATORS (Page 4 of 5)

Indicator name	Definition	Unit
Digital services		
People using digitally enabled services	<p>The number of people using new or enhanced digitally enabled services supported by IBRD, IDA, IFC and MIGA activities. This includes new digitally enabled services (i.e., previously-manual/analog services that are now digitalized) as well as enhancements to existing digitally enabled services (i.e., improvements in areas such as coverage, affordability, efficiency), provided by the public or private sector. The indicator includes two aspects:</p> <ul style="list-style-type: none"> • <i>New services</i> are those services that were entirely manual in the past but are now digitalized (e.g., cash payment converted from manual to digital, or parts of antenatal care for pregnant women now including tele-visits with specialized obstetricians for high-risk pregnancies). • <i>Enhanced services</i> are those that might have been digitalized partially or fully in the past but have now improved or deepened the digitalization to make those services more affordable, efficient, transparent, inclusive, and accessible, more privacy-protecting, among others. <p>This indicator will be digital disaggregation of a number of corporate scorecard indicators where services have been digitally enabled, such as: millions of beneficiaries of social safety net programs; millions of people receiving quality health, nutrition and population services; millions of people and businesses using financial services. This will also include those delivered by sector specific digitally enabled services not featured in the corporate scorecard.</p> <p>Two types of users will be counted under this indicator. “<i>Active Users</i>” of digitally enabled services refers to those individuals, businesses, households, or other institutions (schools, health facilities, etc.) who actively use a digitally enabled service. That is receiving goods or services through the technology (typically a digital platform) with or without payment. “<i>Covered users</i>” refers to those covered by services that might be activated only in times of emergency. For example, receiving alerts on incoming natural disaster. For push services such as emergency alerts, teams should only count those users who have access to devices that services are being pushed to. Another type of user which will not be counted is a “<i>Registered user</i>”, who is any individual or business that is registered on a technology (e.g., a digital platform), giving them the option to use the technology-enabled product. Such “registered users” will not count as having used services under this indicator. <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i></p>	Beneficiaries (millions)
Gender equality		
People benefitting from actions to advance gender equality, of which (%) from actions that expand and enable economic opportunities	<p>The indicator will measure number of people directly benefitting from operations supported by the IBRD, IDA, IFC, and MIGA that include actions designed to advance gender equality. “<i>Actions to advance gender equality</i>” refers to specific interventions within WBG operations. The indicator uses the existing Gender Tag/Flag focus on actions to advance gender equality to capture the number of people benefitting from those actions. Operations with these actions are validated by the gender departments in the Bank, IFC, and MIGA, and are indicated via the Gender Tag (for Bank operations) or Gender Flag (for IFC and MIGA operations). The aggregate value is the summation of beneficiaries from a wide variety of such actions across the WBG portfolio. The indicator will also report on a subset of beneficiaries of specific actions to expand and enable economic opportunities. <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i></p>	Beneficiaries (millions)
People and businesses using financial services, of which (%) are women	<p>The number of people, microenterprises, Small and Medium Enterprises (SMEs), and large businesses reached with and actively using financial services supported by IBRD, IDA, IFC, and MIGA. Financial services include transaction accounts¹⁰ and payments, credit products - including factoring, leasing - and equity, savings, pensions, investment products, and insurance (including disaster risk insurance). The indicator intends to measure active use, beyond access/ownership, with a view to capturing the number of people and businesses expected to benefit from financial services. <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i></p>	Beneficiaries (millions)
Better lives for people in fragility, conflict and violence		
Displaced people and people in host communities provided with services and livelihoods	<p>The number of refugees, IDPs, and people in host communities deliberately supported with accessing and utilizing services and livelihoods. This indicator includes, but is not limited to, policy reforms allowing refugees to access the labor force and services, improved access to and quality of education and health services; jobs programs, entrepreneurship development, agriculture, trade, and financial services; access to urban and community services and utilities; access to rural and urban infrastructure; civil registries and legal aid. This indicator will measure support provided through IDA and IBRD operations, as well as results delivered through IFC Investments, Advisory Services, and Upstream, and through projects supported by MIGA guarantees to clients, in locations where forcibly displaced persons (i.e., refugees and IDPs) and their hosting communities reside. <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i></p>	Beneficiaries (millions)

III. WBG RESULTS INDICATORS (Page 5 of 5)

Indicator name	Definition	Unit
More private investment		
Total private capital mobilized	Financing contributed by private entities alongside a commitment, including financing or guarantees, or technical assistance delivery made by the World Bank, IFC, and MIGA. ⁸ A private entity is any legal entity, whether privately or publicly owned, or natural person: (i) which is carrying out or is established for a business purpose and is operating on a commercial basis; (ii) which is financially and managerially autonomous; and (iii) whose day-to-day management is not controlled by the government. Some public entities organized with financial and managerial autonomy are counted as private entities. Other examples include registered commercial banks, insurance companies, sovereign wealth funds and other institutional investors investing primarily on commercial basis. PCM includes sponsor financing if the sponsor qualifies as a private entity. <i>Source: WB Operations Portal; ISR/ICR database; IFC Results Measurement System; MIGA Results Measurement System.</i>	US\$ (billions)

WORLD BANK GROUP SCORECARD
