Kenya Climate Smart Agriculture Project (P154784)

EASTERN AND SOUTHERN AFRICA | Kenya | Agriculture and Food Global Practice |

IBRD/IDA | Investment Project Financing | FY 2017 | Seq No: 12 | ARCHIVED on 27-Jun-2022 | ISR51173 |

Implementing Agencies: Kenya Agriculture and Livestock Research Organisation (KALRO), Ministry of Agriculture, Livestock and Fisheries, The National Treasury

Key Dates

Key Project Dates

Bank Approval Date: 09-Feb-2017 Effectiveness Date: 16-May-2017

Planned Mid Term Review Date: 30-Sep-2020 Actual Mid-Term Review Date: 04-Sep-2020

Original Closing Date: 31-Jan-2022 Revised Closing Date: 30-Jun-2023

Project Development Objectives

Project Development Objective (from Project Appraisal Document)

To increase agricultural productivity and build resilience to climate change risks in the targeted smallholder farming and pastoralcommunities in Kenya, and in the event of an Eligible Crisis or Emergency, to provide immediate and effective response.

Has the Project Development Objective been changed since Board Approval of the Project Objective?

No

Components Table

Name

Component 1: Upscaling Climate-Smart Agricultural Practices (US\$163.8 million equivalent, of which IDA

US\$150.0 million equivalent):(Cost \$163.80 M)

Component 2: Strengthening Climate-Smart Agricultural Research and Seed Systems (US\$53.7 million

equivalent, of which IDA US\$50.0 million equivalent):(Cost \$38.70 M)

Component 3: Supporting Agro-weather, Market, Climate, and Advisory Services (US\$32.9 million

equivalent, of which IDA US\$30.0 million equivalent):(Cost \$33.63 M)

Component 4: Project Coordination and Management (US\$29.3 million equivalent, of which IDA US\$20.0

million equivalent):(Cost \$29.80 M)

Component 5: Contingency Emergency Response (US\$0 million from IDA):(Cost \$13.77 M)

Overall Ratings

| Name | Previous Rating | Current Rating |
|--------------------------------------|-----------------|----------------|
| Progress towards achievement of PDO | Satisfactory | □Satisfactory |
| Overall Implementation Progress (IP) | □Satisfactory | □Satisfactory |
| Overall Risk Rating | □Substantial | □Substantial |

Implementation Status and Key Decisions

This ISR is based on the implementation support mission undertaken from April 28 to May 12, 2022. The project was approved by the board in Feb 2017 and became effective in May 2017. A project restructuring was undertaken in October 2020 and is now scheduled to close on June 30, 2023.

6/27/2022 Page 1 of 12

The project continues to perform well on the disbursements front with current disbursement at 94.27%. In terms of project results, there are several notable achievements both at the county level and the national level. A total of 677,000 farmers across 24 counties are receiving a range of benefits from input support to access to modern agriculture technologies, innovations and management practices (TIMPs) to access to markets and access a range of agro-weather and market advisories. The sustainability of the project interventions is envisaged through the strengthening of the community institutions namely, the 144 Community Driven Development Committees (CDDCs – One in every project ward) and 204 Producer Organisations (POs- atleast 5 in every project county) that have been established and registered with dedicated bank accounts. These CDDCs and POs are expected to last beyond the project period and ensure that project farmers are able to continue accessing a range of input services, extension and market linkages.

Given the continued good progress since the last implementation support mission across all components both the PDO and IP ratings are being retained as "Satisfactory".

Overall Comments

All intermediate indicators except for the below three are on track to be fully achieved. For some of the indicators, the project will likely surpass the end target as well.

Please see below detailed explanation on the three intermediate indicators where the project is lagging behind

- 1. Reduced net GHG emissions per unit (kilogram) of product produced for selected agricultural commodities This is the only indicator for which the project has not yet reported the progress. This is due to the fact that project could not find the appropriate expertise to undertake this tracking. The project has now identified these experts and will report on the results by September 2022.
- 2. Users receiving integrated agro weather information and market information services (Number): The project is at 30% achievement currently. During the mission, discussions were held and a clear action plan has been developed on scaling up the access to users.
- 3. Productive assets brought under TIMPs as a result of the project: While project is on track to achieve the target in terms of the number of livestock, it is lagging behind the target in terms of the acerage. With the increase in adoption of TIMPs, the achievement is likely to go up in the next 6 months significantly.
