REPUBLIC OF SERBIA

SERBIA ACCELERATING INNOVATION AND GROWTH ENTREPRENEURSHIP PROJECT

Stakeholder Engagement Plan
Draft

October 2019
1. Introduction

The Serbia Accelerating Innovation and Growth Entrepreneurship (SAIGE) Project aims to enhance Serbia’s growth and competitiveness by improving (i) relevance and quality of scientific research, and (ii) entrepreneurship innovation and growth finance accessibility.

The SAIGE Project is part of a comprehensive set of reforms of the Serbian R&D and Innovation sector, which includes reforms to the model of financing scientific research and introduction of various business innovation support measures. Project implementation will be led and coordinated by the Ministry of Education, Science, and Technological Development, through the Science Fund (SF) and the Innovation Fund (IF).

a. Purpose of the SEP

The purpose of the present Stakeholder Engagement Plan (SEP) is to outline the target groups and methods of stakeholder engagement and the responsibilities in the implementation of stakeholder engagement activities. The intention of the SEP is to activate the engagement of stakeholders in a timely manner during project preparation and implementation. Specifically, SEP serves the following purposes: i) stakeholder identification and analysis; (ii) planning engagement modalities and effective communication tools for consultations and disclosure; (iii) defining role and responsibilities of different actors in implementing the SEP; (iv) defining the Project’s Grievance Mechanism (GM) and (v) providing feedback to stakeholders; (vi) monitoring and reporting of the SEP.

b. Project Description

The SAIGE Project will consist of the following three components and subcomponents:

Component 1: Research sector reforms (US$38 million)
- Sub-Component 1.1: Science Fund (US$25 million)
- Sub-Component 1.2: RDI Reforms (US$9 million)
- Sub-Component 1.3: Serbian Diaspora Facility (US$4 million)

This component consists of three subcomponents which contribute to better relevance and excellence of scientific research and are part of a comprehensive set of reforms of the Serbian science and research system.

Sub-Component 1.1 pertains to Science Fund (SF) programs/activities that include competitive basic science grants, applied research grants with incentives for promoting linkages between the private sector and R&D community, incentives for enhancing collaboration with EU (e.g., Horizon 2020, Horizon Europe) and other international programs, and Smart Specialization Strategy (S3) and infrastructure support for SROs. Activities under this Sub-Component are also to support the operationalization of the Science Fund, including governance, organizational structure, monitoring and evaluation (M&E) and other key components. In addition, the project is to support designing the Science Fund programs based on international best practices. The project is to provide co-financing for direct grants for public research financing under programs designed and developed in phases.

Sub-Component 1.2 RDI Reforms supports system reforms of R&D Institutes (RDIs) by providing appropriate incentives for undertaking institutional reforms by RDIs on a voluntary (opt-in) basis. This will
include providing financing to a select group of RDIs (5-6) who are willing and able to reform. RDIs who wish to participate in the program will undergo detailed assessments - first a self-assessment to be done by each RDI management, and second, a detailed independent external assessment, to be conducted by a team of international experts. Based on such due-diligence, a detailed transformation plan will be prepared and the project will provide financing for the implementation and monitoring of the transformation plans.

Sub-Component 1.3 refers to Serbian Diaspora Facility (SDF). The goal of the program is to support the launch of a Serbian Diaspora Facility (SDF) to leverage the strengths and desire of its diaspora community and benefit from this immense potential in the development of research, innovation and entrepreneurship in Serbia. This program will aim to attract promising scientists, researchers and entrepreneurs from the Serbian diaspora community to transfer knowledge and skills back to Serbia through a variety of activities including participation in policy making, governance, program management, advisory bodies and networking; collaboration in scientific and applied research and technology transfer; and participation in innovative entrepreneurship mentoring and angel investments.

**Component 2: Enterprise Acceleration (US$8 million)**
The goal of the program will be to triple the valuation of the company, i.e. to rapidly advance its development. The enterprise acceleration program will consist of two streams: one for early (idea) stage, and the other for growth (scale-up) stage companies. Each stream will serve 20 companies (teams of two founders) per year, selected competitively by participating investors (including angel investors, early stage VC funds, etc.). Each stream will consist of a structured, 2-3-month program of intensive training and mentoring. The acceleration program will be implemented by the Innovation Fund (IF) building on their capacity and complementing their other enterprise innovation support programs.

**Component 3: Project Implementation and Monitoring (US$2 million)**
This component will finance activities related to project implementation and monitoring including operations of a Project Implementation Unit (PIU). This will include operational and fiduciary (procurement, environmental and social safeguards), M&E, project audits, studies, policy/program design and capacity building support to the MOESTD, SF, IF and related agencies.

c. **Summary of social and environmental risks and impacts of the Project**
The project is classified as Moderate Risk taking in account the nature of the project, size of sub-projects and the experience of the implementing agency in managing similar activities and the application of new and energy efficient technologies. Project will not directly fund civil works and no adverse impacts such as involuntary land acquisition, impacts on biodiversity, on cultural heritage, are expected. Also, the Project will not finance any of the activities listed in the World Bank Group - IFC Exclusion List. The environmental risks will be small in magnitude, of temporary nature and directly associated with the listed investments and TA activities under the Project. In few cases, the mitigation activities will need to be designed to deal with disposal of wastewater, communal, industrial or hazardous waste. Any activities that may have moderate and significant environmental and social impacts, including involuntary impacts on land or assets, and unpredictable risks for the environment, community health and safety will be deemed ineligible through the Project’s Environmental and Social Screening Procedure to be used for
defining grant eligibility. Any minor impacts will be identified by the ESMF and addressed in activity-specific ESMPs.

2. Summary of Previous Stakeholder Engagement Activities relevant to the Project

a. Consultations on “Research for Innovation” Strategy and related laws

The Republic of Serbia through the MoESTD has taken significant steps towards the comprehensive reform of the science and research system aimed at improving the excellence and relevance of scientific research. The basis for these reforms is defined in the Research for Innovation Strategy (2016-2020) which was adopted by the Government in 2016. The strategy was developed as part of the World Bank supported “Serbia Research Innovation and Technology Transfer Project” (SRITTP) implemented between 2015 and 2019.

During the preparation of the abovementioned “Research for Innovation” Strategy in 2016, the MoESTD conducted extensive public consultations involving all stakeholders, interested parties (such as private and public scientific and research institutes, faculties, universities, center of excellence, companies), researchers and citizens. Besides receiving written feedback, the MoESTD organized consultation meetings in all major university centers and with the private sector in collaboration with the Chamber of Commerce. A number of roundtables were organized during the drafting of the Strategy as well. Lessons from this stakeholder engagement processes show that early involvement of key stakeholders in the policy design process ensures better outcomes, including better identification of stakeholder needs, support during the public consultation and policy adoption process, and easier implementation of new policies.

Recently, two new important laws were adopted: the Law on Science and Research (in July 2019) and the Law on the Science Fund (in December 2018). The adoption of these laws is a key step in the reform of the system of organisation and financing of science in Serbia.

The adoption of the Law on Science and Research (RS Official Gazette, no. 49/2019-3) reformed the system of financing scientific research in line with the strategic goal to improve the system, to respond to the challenges and needs of the society and the have an efficient and optimal use of budget funds. A financing model has been developed which combines institutional and competitive project-based financing. The goal on one hand is to ensure stable financing, and on the other to support excellence in science. Introduction of institutional funding for Research & Development Institutes (RDIs) creates the foundation for further reforms of RDIs envisaged under SAIGE.

Adoption of the Law on the Science Fund (RS Official Gazette, no. 95/2018) provided the basis for the establishment of the Science Fund in 2018, as an independent and expert government entity which will implement project-based funding for scientific research. The Science Fund will use different programs to support the best scientists through a competitive, transparent and merit-based evaluation and selection system. SAIGE Project will support both the design of Science Fund programs in line with international best practices and provide funding for certain grants programs.

Extensive consultations were conducted during 2018 and up to May 2019 prior to the adoption of these two laws. The draft documents were publicly presented, and all proposals, remarks and suggestions were submitted in the written form to the MoESTD. In addition to this, the MoESTD fully complied with the Government procedure on Regulatory Impact Assessment and for each newly proposed document
prepared a report to support the proposed legislation with analytical data, reports and background analyses which reflect the situation in this area. Finally, a report on the consultation process was also prepared as part of the Regulatory Impact Assessment\(^1\).

**b. Consultations on the upcoming “Smart Specialization” Strategy, laws and related bylaws**

In addition to the abovementioned legislations, the MoESTD has recently completed coordination of the Entrepreneurial Discovery Process (EDP) in Q1 and Q2 of 2019, which is an integral part of developing the national Smart Specialization Strategy. The EDP process included a series of roundtables in 2019 held across Serbia which had significant representation of academia, the private sector and civil society, with the objective of defining national priorities for the Smart Specialization Strategy. Supported by the Chamber of Commerce, this process had helped the MoESTD deepen its engagement with the private sector and part of the implementation of the Strategy will be in ensuring that this platform for dialogue is a continuous instrument of the MoESTD and not a one-off event.

MoESTD is also in the process of preparing the by-laws for institutional financing of RDIs which will be of high relevance for the implementation of Component 1.2. of the project which is to be implemented by the MoESTD. For this purpose, the MoESTD will establish a working group with key stakeholders to discuss the draft document. The MoESTD has also worked with the Association of Research Institutes which has developed a draft methodology for the self-assessment of RDIs and which will be further refined and introduced as part of the by-laws.

**c. Consultations held on proposed SAIGE Project activities**

**Innovation Fund**

During the first week of October in 2018, World Bank together with the Innovation Fund organized a pilot acceleration program in Belgrade called SPARK week, so as to provide input for preparation of the future full-fledged acceleration program. The emphasis was on mentoring by experienced mentors matched to the participating companies by sector, and on evaluation of the program in order to gauge learning and financing needs. The key objective of the activity was to support participating entrepreneurs by providing them an opportunity to assess and strengthen their business modeling and pitching skills, fundraising know-how, and their ability to work effectively with mentors. Preparation for SPARK week enabled the IF to assess potential local and global pool of mentors, investors, startups and other community stakeholders such as Hubs and STP Belgrade, NGOs, sponsors, media and others. Workshops on themes such as fundraising and investment readiness were held during SPARK week in addition to interaction with potential investors. It was identified that most startups need assistance with growth phase or early stage funding. Workshop sessions received high marks across the board, with particular satisfaction expressed with the module on sales strategies, pitch feedback, and informal peer-to-peer mentoring.

**Science Fund**

Since its establishment in 2018, the Science Fund has been carrying out consultations with all major stakeholders pertinent to its programs and objectives, including, but not limited to, the MoESTD, the Cabinet of the Prime Minister of the Republic of Serbia, representatives of SROs, members of the scientific community in Serbia, research organizations, individual researchers, former and current participants in

\(^1\)http://vs3836.cloudhosting.rs/mislenja/1511/ana/Analiza%20efekata%20Zakona%20Fondu%20za%20nauku.pdf (document in Serbian only)
Horizon 2020 calls for proposals, representatives of the European Research Council (ERC), Serbian research diaspora, as well as representatives of other funding agencies from European countries. Stakeholder engagement has been conducted through meetings, interviews, and online correspondence.

d. MoESTD’s ongoing consultations with stakeholders

The MoESTD holds regular meetings both with individual research institutions and researchers, but also with organizations that represent the interests of the research community such as the Association of Institutes, the Union of Scientific Research Employees, the Conference of Universities, the Serbian Academy of Sciences and Arts and other. Representatives of the research and business community take active part in the work of MoESTD advisory bodies such as the National Council for Science and Technological Development and the Scientific Boards established for all fields of research. Besides regular communication with associations that represent research interests, the MoESTD expanded its engagement with civil society through the EDP process which has been described in greater detail above.

e. Other stakeholder engagement activities conducted between 2015-2019

The project is a continuation of long-term engagement with governmental and private sector, but also civil society organizations and individuals. These have included interviews, focus groups, and roundtable consultations in 2015, 2016, 2017, 2018, and 2019, with individual researchers, representatives of R&D institutes and faculties, Serbian Academy of Sciences and Arts, Chamber of Commerce, Serbian Association of Managers, Serbian Business Angels Network, Serbian Venture Network, Digital Serbian network, representatives of the early stage investor community (StartLabs, South Central Ventures, ICT Hub Ventures, Serbian Business Angels Network) entrepreneurship support organizations such as incubators and hubs (StartIT, ICT Hub, Potkrovlje, Impact Hub, University of Belgrade Faculty of Engineering ICT Inkubator, Vojvodina ICT Cluster) and individual entrepreneurs, investors, and business leaders. Further, extensive analysis of the R&D sector, which included a series of policy notes, involved structured engagement with stakeholders of the R&D system in Serbia, while an entrepreneurship ecosystem assessment gathered stakeholders on a series of general and specific topics.

3. Stakeholder Identification and Analysis

The Project has multiple stakeholders from government, private sector, research sector and donor organizations involved in the innovation and entrepreneurship eco-system in Serbia and relevant to the Project. The stakeholder risk is moderate due to the multitude and diversity of stakeholders.

a. Project affected parties:

1) Public and private R&D Institutions – in the new model of financing research activities, RDIs will receive performance-based institutional financing and will not entirely depend on project-based financing. Further, under SAIGE Project, RDIs will also benefit from support for their external assessments and transformation plans. This will allow them to develop more long-term strategic planning, and enhance their excellence and relevance of their R&D outputs.

2) Researchers – competitive grants offered by the SF will support the best researchers by providing them with grants that match their project needs. Preparing project proposals for the SF will improve their capacity to bid for EU and other international research grants.

3) Private sector enterprises and investors – through Component 1, new opportunities for business-academia collaboration will open and will complement the existing programs of the Innovation
Fund. Through Component 2, enterprise acceleration component, entrepreneurs, early stage companies, individual investors, and investment funds, will have increased access to investment, knowledge, and deal flow, respectively.

4) Staff from MoESTD, SF, IF and participating RDIs- technical assistance activities will increase capacity in each of these institution, and will include subject specific workshops and training events in which staff will participate. In addition, staff will participate in administrative training sessions offered by the World Bank (e.g. on procurement).

5) Potential investors and entrepreneurship support organizations – Component 2 includes technical assistance through which entrepreneurship intermediaries will have the chance to observe implementation and participate in training workshops on methodologies for acceleration. In addition, technical assistance will cover training and convening events for potential and existing angel investors, with the goal of helping angel investors organize into networks, based on best practices for angel networks from around the world.

b. Other Interested Parties:
1) Chamber of Commerce
2) Serbian Venture Network
3) Digital Serbian network
4) Business associations
5) The Scientific community in Serbia
6) Media
7) General Public

A number of local (Serbian and regional) partners have already been identified in two categories (investors and entrepreneurship support organizations), including SC Ventures, ICT Hub Ventures, and StartLabs (as a source of financing and mentoring), StartIT, Digital Serbia Initiative, ICT Hub, Serbian Association of Managers, and Science Technology Park (as a source of entrepreneurship support services and mentors), among others (for instance, the Chamber of Commerce is being considered but not yet confirmed).

The timing and methods of engagement with identified stakeholders is outlined below.

c. Gender

Sub-component 1.1: Science Fund
Serbia has achieved high level of gender equality in science and research participation. As of 2016, women represent at 48.4 percent of researchers 2016 (UNESCO, Women in Science, 2018). There are positive indicators in terms of gender balance based on preliminary data on the first Call for Proposals of the SF. Further, based on an annual satisfaction survey (sex-disaggregated), specific programming will be considered during design stages to encourage participation of female scientists and entrepreneurs in the Science Fund programs and diaspora activities.

Component 2: Enterprise Acceleration
The percentage of women applicants from companies (owners and employees) is expected to be low due to the underrepresentation of women in early-stage innovative entrepreneurship. The portion of innovation companies with at least one woman founder is estimated to be 17 percent (Digital Serbia Initiative, 2018). The share of women working in technology startups in the area of software development is approaching 15 percent, which, while above international standards, is still significantly below 50
percent. To encourage the participation of women entrepreneurs and women-owned businesses in the enterprise acceleration program, the Project will:

1. Increase the visibility of support programs for women entrepreneurs and conduct targeted outreach to women through entrepreneurship support organizations and women business networks.

2. Deliver programming specific to women entrepreneurs through local partner organizations, including:
   1. Mentoring by experienced women founders
   2. Workshops on topics of specific interest to women founders and managers
   3. Peer networking
   4. Introductions to female angel investors

3. Continuously adapt the design and scope of business acceleration support to the needs of women entrepreneurs as expressed through the annual applicant/beneficiary satisfaction survey (sex-disaggregated).

d. Disadvantaged/ Vulnerable Individuals or Groups

Project beneficiaries are new and established researchers and owners of innovation companies. These individuals typically have high level of education and social capital and tend not to belong to disadvantaged/vulnerable groups in the society. Non-discrimination principles will be reflected in the TA provided to selected RDIs, embedded in the design of grant support programs and the proposed stakeholder engagement activities.

However, as part of its visibility/communication strategy, the Project will promote and highlight subprojects that have social benefits for disadvantaged groups and individuals in the society such as the poor, disabled and socially excluded.

e. Stakeholder Engagement Plan

i. Planned stakeholder engagement activities by the Science Fund (Sub Component 1.1)

The SF will continue to consult with and engage all relevant stakeholders and interested parties in different stages of planning and implementing its programs.

a. The SF will organize action events for identified stakeholders/ target audiences:
   - Launch of call and promotional events
   - Training workshops (weekly “open doors” for potential applicants, webinars on targeted topics and for targeted audiences outside of Belgrade)
   - Responses to frequently asked questions published on SF website
   - Award ceremony
   - Other promotional events

b. Recurrent communication activities:
   - Press conferences
   - Press releases
   - Interviews for the media
   - Photographs, photo news
   - Features/success stories
   - Participation in events (conferences, panels, presentations, fairs)
• Quarterly newsletters with information about progress on the project and upcoming activities.

c. **Beneficiary feedback activities**

• Annual satisfaction surveys on SF research programs

The SF will organize promotional activities throughout Serbia upon launching future calls for proposals. The SF has weekly “open doors” for consultations for interested applicants during which it provides information about the application and research project implementation process.

Earlier the SF has organized a targeted budget workshop – live event and webinar, as well as webinar responses to frequently asked questions from applicants. The above events have raised a high level of public interest in the SF’s activities and call for proposals. The SF will tailor the activities in line with future calls for proposals and the needs of the target audiences thereof.

The SF will proactively collect feedback about its research programs to ensure that they remain relevant to the research community in Serbia. The SF is currently administering its first Call for Proposals - Program for excellent projects of young researchers (PROMIS). Applicants of PROMIS, as well as others who have participated in any of the SF’s preparatory activities for PROMIS (presentations across Serbia, open doors, budget workshops, webinars, email enquiries), will be requested to provide feedback on preferred research grant programs, the application process and the support provided during the application process, including trainings. The results thereof will be used to improve the SF’s communication strategy, future programs and the application process under the SAIGE Project. During SAIGE Project implementation, annually the SF will send out online surveys to all applicants following the completion of the evaluation process and announcement of grantees. Survey results and description of how the feedback received has influenced future research program scope and design will be published on SF website on an annual basis. Additionally, a questionnaire will be sent to recipients of SF grants following the completion of their projects.

ii. **Planned stakeholder engagement activities by the MoESTD (Sub Component 1.2)**

The MoESTD to continue to inform and engage stakeholders through various activities. For the RDI Reform Component of the project, for which the MoESTD is the project implementing entity, the MoESTD will ensure that all RDIs are consulted and informed in a timely manner on component activities. The MoESTD will work closely with the Association of research institutes, which is established by law to represent the views of RDIs, as well as with other key stakeholders (such as the Union of employees in the science sector) to ensure that all views are taken into account during the implementation of this component.

d. **The MoESTD will organize action events for identified stakeholders/ target audiences:**

• Launch of RDI Reform component (to launch the Call for Expression of interest for RDIs to participate in this component)
• Training and information workshops (while the Call for EoI is open)
• Other promotional events

e. **Recurrent communication activities:**

• Press conferences
• Press releases
• Interviews for the media
• Photographs, photo news
• Features/success stories
• Participation in events (conferences, panels, presentations, fairs)

iii. Planed stakeholder engagement activities by the Innovation Fund (Component 2)

The IF plans to continue its previously established practice of informing, consulting and encouraging stakeholders, including Applicants and Investors, to engage in IF activities (training, mentoring and matching grants). All the support will be implemented in line with principles of transparency and equal opportunities for all Applicants. Project events and technical assistance provided will be accessible under equal terms to all interested Applicants.

a. The IF will organize various events for identified stakeholders/ target audiences:
   • Launch event
   • Information sessions
   • Networking sessions
   • Matchmaking sessions
   • Awardee ceremonies
   • Other promotional events

b. Recurrent communication activities:
   • Press conferences
   • Press releases
   • Interviews for the media
   • Video and photo news
   • Features/success stories
   • Participation in events (conferences, panels, presentations, fairs)
   • Q&A on IFs website

c. Beneficiary feedback activities

Annual satisfaction surveys on IF acceleration program
First, the IF will organize an official launch event of the Acceleration program. Following the launch event, the IF will organize the information sessions which will be held, giving a series of presentations to promote the acceleration program and inform potential Applicants, including targeted communication and information sessions for women entrepreneurs. Consequently information sessions will be organized to provide detailed instructions and guidance on the application preparation process, highlighting principles and potential issues behind the implementation of the acceleration program, identification of specific elements, and relation to formal rules of the acceleration program. Entrepreneurship support organizations will also facilitate the acceleration program promotion. Information sessions will be conducted in the first months upon publishing the Call for Proposals (CFP). The IF will publish on its website and its social network information on when and where the information sessions will be organized. Local entrepreneurship support organizations will conduct targeted outreach to women-owned enterprises in their geographical area.
The networking and matchmaking sessions will be conducted in the later months upon publication of the CfP with the aim of reaching out and connecting owners and employees of companies and potential investors and various entrepreneurship support organizations.

Other promotional events include IF participation and presentation of the acceleration program and the achieved results thus far at the various events organized by IF (attended by high officials both local and international) and by IF partners, stakeholders, presentation at fairs (e.g. International fair of technics and technical achievements in Belgrade), etc.

The IF will proactively collect feedback about the Acceleration program to assess its progress and relevance to targeted enterprises. Annually, the IF will send out an online satisfaction surveys to all applicants of previous the previous program to gauge their satisfaction with and room for improving the program. The IF will collect feedback on: i) Acceleration program application process and the quality and effectiveness of IF sessions, ii) project application and grant reporting requirements, iii) level of gender-equity in the selection process; iv) quality and effectiveness of the tailored acceleration technical assistance (TA). The survey results will be soliciting feedback on the effectiveness of the project activities (both financial and technical) aimed at business acceleration. This will allow the IF to identify potential design issues related to access and implementation of acceleration program and the effectiveness of trainings and TA. The survey data will be disaggregated by age, gender and location. Survey results will be published on the IF website, sent to relevant stakeholders and discussed at steering committee meetings.

iv. Methods of communication with identified Stakeholders by the Science Fund and MoESTD (component 1) and Innovation Fund (component 2)

Methods of communication with identified target audiences through the SAIGE Project presence on the internet (not just via the MoESTD, IF and SF websites); through printed, on-line and audio-visual and social media. It also indicates what kind of information should be disseminated through which communication platform.

Visibility/Informational materials – in order to build awareness of the SAIGE Project: visual identity, roll-up, back drop, name tags, leaflets, notebooks, posters, brochures, agendas, e-invitation and cover pages for social networks, video clips and etc. Visibility materials are intended for potential applicants and wider audience attending MoESTD’s, IF’s and SF’s events.

Mass media Communication - In its communication with the relevant audiences, the MoESTD, IF and the SF will use a variety of mass media - electronic, print and social, national and local - with which it will generate opportunities for meaningful and regular coverage.

Press release - IF communicates about major project achievements on IF’s website and Facebook/Twitter/LinkedIn/YouTube page and tries to get stories in relevant media, such as national media, local media. Specific media will be identified depending on decisions like where the face-to-face workshops are organized. The IF will produce small video stories about successful initiatives supported via the project. These will be published on the IF website and social media. Similarly, the SF will use their website and social media to report on major project achievements.
Websites – the IF website will have a section where information about the project as well as press releases and other relevant project material are stored. Target group network are urged to distribute relevant information about the project on their website. The SF website contains information about the current call for proposals and expressions of interest, as well as information from promotion events, workshops and other public events. The MoESTD will also include information about the project and all major milestones on its website.

Social media - IF uses Twitter to provide short updates about project and also use it as a platform for both the regular and special communication activities. IF also uses Facebook, LinkedIn and YouTube to communicate the same stories as on website and Twitter, to reach a wider audience. The SF uses social media to promote its program activities, as well as to promote Calls for Expression of interest for Peer Reviewers and Program Board Members, respectively.

Awareness raising events – in order to increase target group knowledge about the project’s opportunities and impact, including awareness raising about research ethics and procedures.

Satisfaction surveys - Two annual surveys will be conducted, one with beneficiaries of Science Fund programs, and another with beneficiaries of Innovation Fund programs, to gauge their satisfaction with and room for improving the programs. The results of these annual surveys and the associated changes for future programming will be monitored and reported back to the stakeholders. The data from these surveys will be gender disaggregated where possible.

v. Preliminary SEP implementation

MoESTD/PIU facilitated by SF and IF will be responsible for planning and implementation of stakeholder engagement activities, as well as other relevant outreach, disclosure and consultation activities. Based on the needs of the SEP, the stakeholder engagement budget will cover the following activities: (i) development of communication strategy, (ii) applicant/beneficiary survey (after each grant round), (iii) media coverage expenditures; (iv) printed outreach materials; (v) video (clips) production; (vi) workshops/sessions/events. The tentative budget for these activities is US$ 200,000 (in line with the initial procurement plan for the SAIGE project).

To ensure successful SEP implementation, the Project will consider part-time engagement of a Communication Specialist within PIU under the Component 3: Project Implementation and Monitoring.

f. Grievance Mechanism

a. IF existing Grievance Mechanism:

The IF has an operating GM in place. All complaints are recorded and processed by the IF staff using the established procedures during the piloting phase of IPA 2011. Formal complaints about the outcome of the evaluation process (or other grievances) is are recorded and summarized in the IF’s “Complaint Monitoring Tool”. The Tool contains info regarding the complaint(s) such as: Project ID, Nature of Complaint, Receipt Date, Complain Date, Detailed Description of the Complaint, Action Taken, Outcome, Status: Pending / Closed. Complaints are submitted by way of a formal letter (via email), written in English,
All complaints are responded to within 8 days of receipt. All complaints are processed regularly, and where applicable, an independent Investment Committee is contacted for assistance. The Applicants’ right to file a fact-based objection to the outcome of the Application status are described in Program manuals (under Project Evaluation and Financing Decision): 

IF Program Managers are responsible for ensuring that each Application receives an objective and fair initial peer review, that the process is transparent, that all applications are treated with equal opportunity and that all applicable laws, regulations, and policies are followed.

**b. SF Grievance Mechanism to be implemented:**

A grievance mechanism will be set up for the Science Fund, following the example of the IF GM, described above.

**a. World Bank Grievance Redress Services**

Communities and individuals who believe that they are adversely affected by a World Bank supported project may submit complaints to existing project-level grievance redress mechanisms or the WB’s Grievance Redress Service (GRS). The GRS ensures that complaints received are promptly reviewed in order to address project-related concerns. Project affected communities and individuals may submit their complaint to the Bank’s independent Inspection Panel which determines whether harm occurred, or could occur, as a result of World Bank non-compliance with its policies and procedures. Complaints may be submitted at any time after concerns have been brought directly to the World Bank’s attention, and Bank Management has been given an opportunity to respond. For information on how to submit complaints to the World Bank’s corporate Grievance Redress Service, please visit http://www.worldbank.org/en/projects-operations/products-and-services/grievance-redress-service. For information on how to submit complaints to the World Bank Inspection Panel, please visit www.inspectionpanel.org.

**g. Implementation Arrangements for Stakeholder Engagement**

**h. Monitoring and Reporting of the SEP**

Component 3 of the SAIGE Project will support monitoring and evaluation (M&E) activities to track, document, and communicate the progress and results of the SAIGE Project, including monitoring of the Stakeholder Engagement Plan. The PIU will be responsible for overall compilation of progress and results. Feedback and grievances received through the project grievance mechanism will be aggregated and included in annual reports. During Project implementation SEP may be updated based on the identification of new stakeholders and/or the need for different forms of stakeholder engagement.
