High Frequency Phone Surveys (HFS) reveal that Covid-19 awareness is widespread in Mali. People have stopped working and households have experienced reductions in income and low engagement in education activities.

**COVID-19 AWARENESS**

90% of people were aware of social distancing in June 2020. 85% were avoiding hand shaking: over 90% in urban areas and 81% in rural areas.

**INCOME**

65% of households experienced a drop in their business income in June 2020: 70% in urban areas and 63% in rural areas. In July 2020, the proportion of households experiencing a drop in income was 48%.

**JOB LOSSES**

28% of people who were working before the pandemic were no longer working in July 2020. Rural workers (30%) were more affected than urban workers (23%) along with the millennials (29%). Women and men were equally affected (28%).

**EDUCATION**

36% of households with children were engaged in learning activities. A larger proportion was engaged in urban areas (44%) in contrast to rural areas (33%).

**FOOD SECURITY**

6% of households ran out of food in the last 30 days as reported in July 2020. A similar figure was observed in rural and urban areas.

Source: https://ourworldindata.org/coronavirus.
Notes: Pre-pandemic was 88% (urban) and 84% (rural).

Source: Data from the High Frequency Phone Surveys (HFS) unless otherwise indicated. Notes: The sample is nationally representative of the current population of households with phone access. Survey rounds correspond to June and July 2020. Between 1700 and 1900 different individuals have been surveyed at each round. The dates in each graph correspond to the last round of the survey for which the respective variable is available. This note uses harmonized indicators which may not match country specific indicators.
