The project will finance the

The project will also finance the cost related to its management, institutional capacity building and training, incremental operational costs resulting from day-to-day activities of the Project Management Unit, and the design of an integrated information system for Monitoring and Evaluation (M&E). The links and complementarities between components 1 and 2 and a detailed description of how the project fits within Morocco's short and medium-term reform of social service delivery are described in Annex 2, section D of the Project Appraisal Document.

The project will be implemented through three components and will use a traditional investment financing approach combined with a results-based financing modality. The traditional investment financing approach will finance the purchase of goods and services and will disburse against eligible expenditures for activities set out in the project's Procurement Plan (PP). The results-based financing modality will be used for some activities in components 1&2 and will reimburse Eligible Expenditure Programs (EEPs) conditioned on the achievement of Disbursement-Linked Indicators (DLIs).
