India: Uttar Pradesh Health Systems Strengthening Project (UPHSSP) (P100304)

The project has made significant progress towards the achievement of its PDO. Most project-supported activities are proceeding well, and project objectives are achieved. End-of project targets for all the outcome indicators have been achieved or surpassed. All intermediate outcome indicators have been achieved or surpassed their end-of-project targets.

The project has fully achieved all the 7 Disbursement Linked Indicators (DLIs) or 25 Disbursement Linked Results (DLRs). However, the achievement of two DLRs under Component 2 related to entry-level national accreditation board for hospitals (NABH) certification needs to be confirmed by the Independent Verification Agency to initiate the disbursement. The project team needs to complete the verification of the remaining two DLRs by September 26, 2019 and share the report with the Bank to process the disbursement.

The Government has ensured the sustainability of most of the project initiatives such as public private partnership (PPP) and human resource support in the hospitals by budgeting for continuation of project activities in the 2019-20 National Health Mission (NHM) Program Implementation Plan (PIP). Similarly, a government order for continuation of support to the Directorate of Medical and Health (henceforth Directorate) is under administrative approval for provision through the State budget. A policy level decision was taken to close the high-end pathology services which will be replaced with in-house labs directly supported by the Directorate. However, the lessons from the implementation of the project supported high-end pathology services will be used at the hospital level to ensure better use and quality of services provided by the in-house labs.

Lastly, the high impact social accountability intervention had drawn NHM to include the same as part of their current PIP. However, NHM was unsuccessful in attaining the necessary approvals in their Record of Proceedings (ROP) for an immediate transition of the intervention.
